# 1- Introduction

---

# Introduction

By joining ancient knowledge with modern design processes, we developed products and systems designed to convert any person into a gardening and urban cultivation enthusiast.

The journey began with the innovative **Minigarden® Vertical**, which was followed by a string of great supplements: **Minigarden® Corner**, the drip Irrigation Kit, **Minigarden® Basic**, a series of protective nutritional additives, **Minigarden® Grow Up & Bug Off**, and finally **Minigarden® Accessories**, the **Minigarden® Watering Can** and **Minigarden® Wall Support**, all providing the perfect complement to our planting systems.

This year, we unveil a set of new accessories with additional functionalities that make Minigarden more accessible and customizable to your taste.

**Minigarden® Fixers** is a new, easy and safe system to fix Minigarden® Vertical and Minigarden® Corner to a wall. Besides this excellent new option, we have also developed specific solutions to **Minigarden® Wall Support** for Minigarden® Vertical, Minigarden® Corner and Minigarden® Basic.

Our **Color Rings Basic S Pots** and **S Uno** add a new dimension to Minigarden® Basic: a range of covers in different colors to make our customer's experience even more unique.

Finally, we're offering new, more comprehensive configurational solutions to our vertical gardening systems: **Minigarden® Vertical Kitchen Garden** and **Minigarden® Corner Column**.

We promise to keep innovating and to keep extending our range with new models and products, thus multiplying the number of solutions that make urban gardening even more accessible.

## 2- Minigarden® Vertical

---

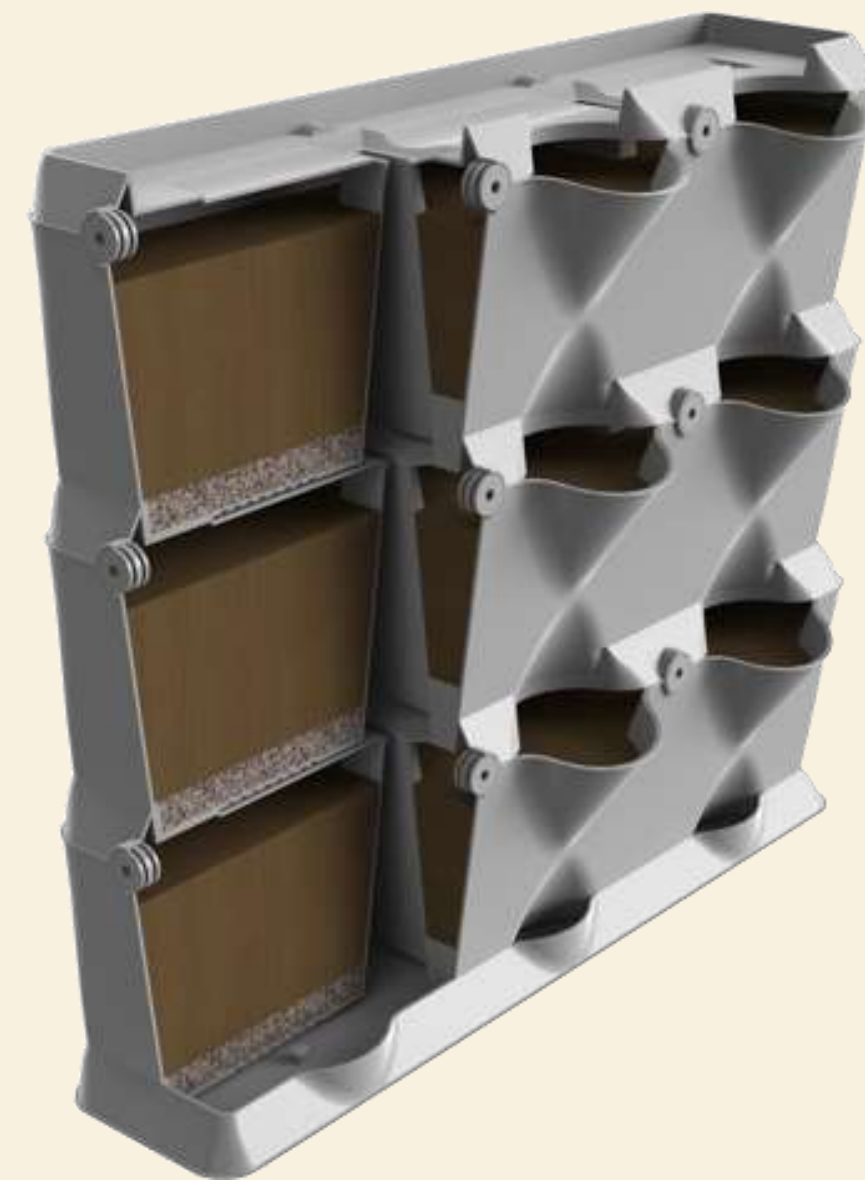

# What it is

**Minigarden® Vertical** is a modular system that allows to vertically grow of ornamental, aromatic and vegetable plants.

**Minigarden® Vertical** is freestanding, self-draining and can be installed inside or outside, depending on the plants grown.

**Minigarden® Vertical**'s modularity allows you to design and install vertical gardens of any dimension very easily, leaving full room for your creativity.

In this cross-section we can see how the modules fit into each other, as well as the substrate filling.

recipient with  
3 cavities

64x19x17cm  
12 liters capacity  
0.72Kg

tray

64x14x3cm  
0.34Kg

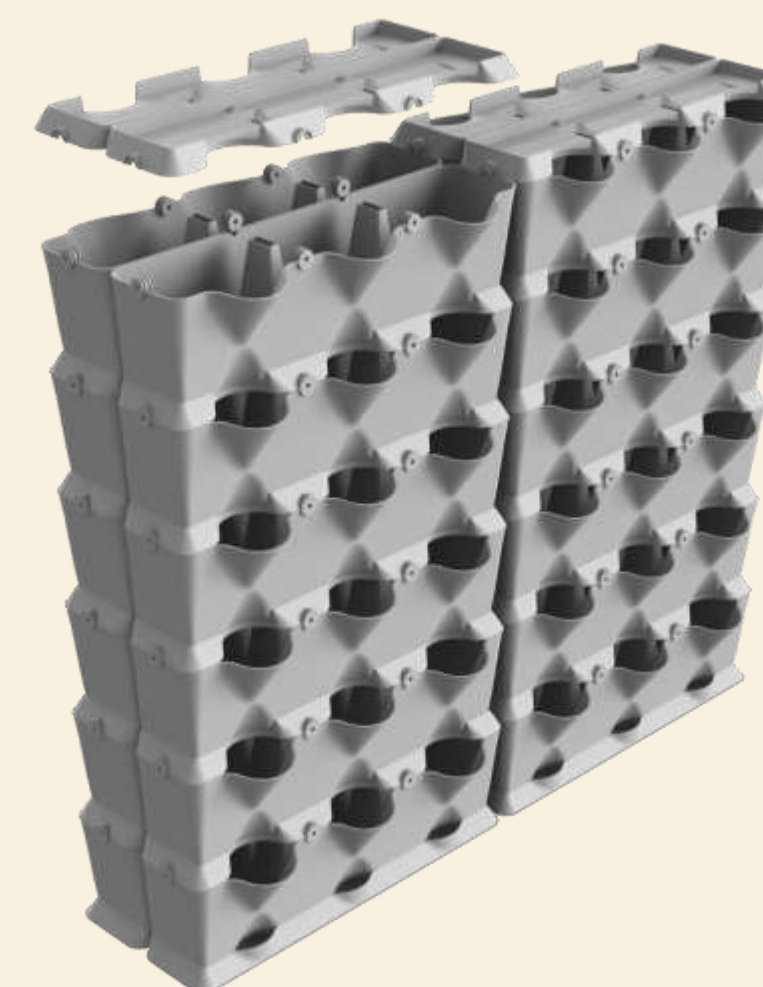

# Design and modularity

**Minigarden® Vertical** system comprises only 4 easy to assemble parts: a lid, 6 circular clips, a central recipient with 3 cavities and a base tray.

The assembly is very simple and the possibilities are limitless. Its modular features allow you to stack it, both vertically and horizontally, in a single row or back-to-back, creating countless combinations.

**Minigarden® Vertical** can be very easily installed inside or outside, embedded in or attached to walls or gables.

Minigarden® Fixers - wall mounting

NEU

# Design and modularity

**Minigarden® Vertical** system versatility and simplicity allows an easy and lasting installation, from the floor or at any height, as illustrated in these pictures.

Whenever needed, **Minigarden® Vertical** can be secured to a wall with the help of **Minigarden® Fixers**, which are placed through the round clips on the wall-facing side ([for more information, please go to page 61](#)). Alternatively, screws can be used instead.

**Minigarden® Vertical** can be used in conjunction with **Minigarden Corner**, thus increasing the number of possible sets designed with these growing systems ([for more information, please go to page 27](#)).

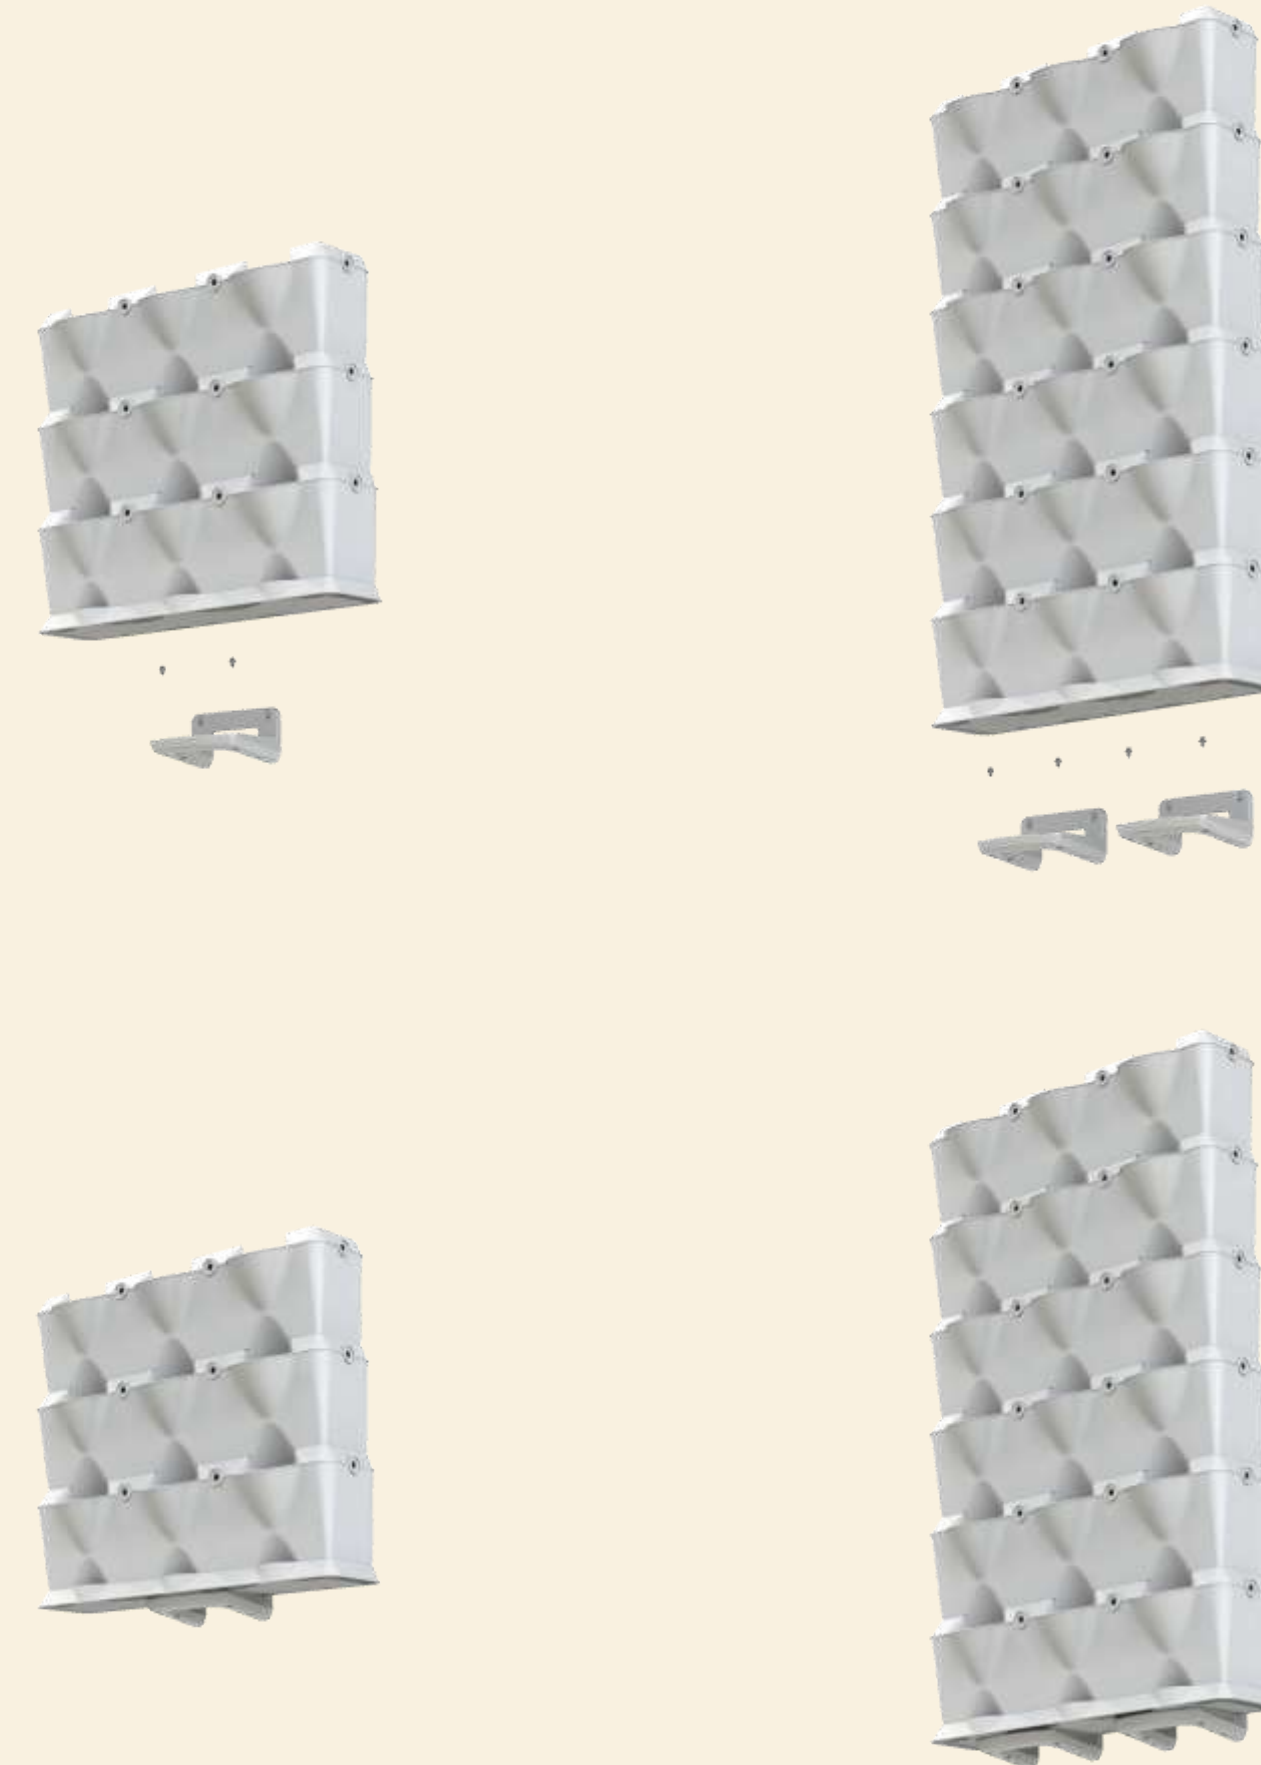

# Design and modularity

Wall Support for Minigarden Vertical is a new accessory that enables the hanging of Minigarden® Vertical ([for more information, please go to page 64](#)).

We suggest the use of 1 Wall Support for Minigarden Vertical to hang up to 3 modules and 2 to 6 modules placed vertically.

URBAN GREEN REVOLUTION

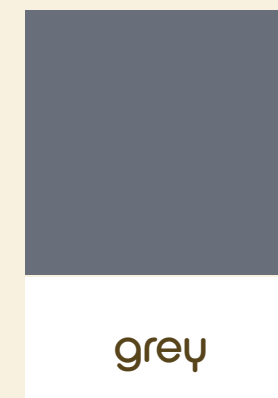

# Sustainable and durable

The ways in which Minigarden systems are combined are only limited by your imagination. Besides its modular features, you can also play with different plants and colours. On top of this, plants are easily replaceable after **Minigarden® Vertical** instalation.

**Minigarden® Vertical** is made of high resistance polypropylene copolymer and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in 5 colours.

grey

black

terracotta

green

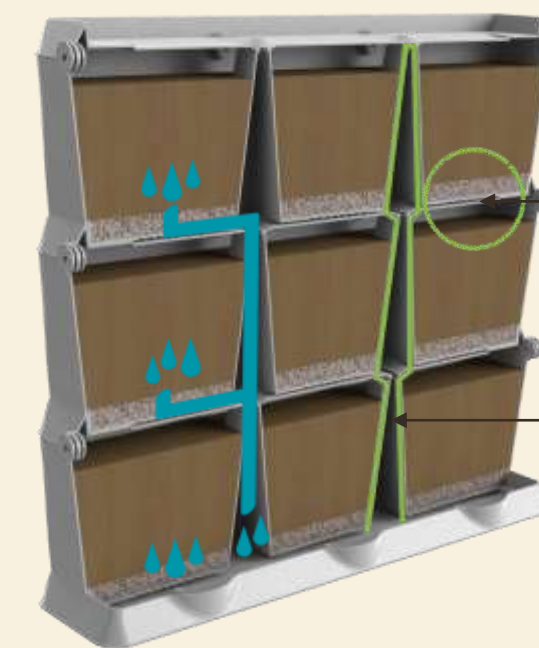

# Watering and nutrition

**Minigarden® Vertical** was designed with an innovative gravitational drainage mechanism. This feature ensures that all excess irrigation water at the plants roots will be drained to the tray at the unit base. This system is very important to ensure planting sustainability in the long run.

At the bottom of each module there are small grills (2 per cavity), through which the excess water runs to the lid directly below the corresponding module and, after that, to the tray at the assembly base.

main collector

For this reason, all the plants grown in the **Minigarden® Vertical** need to be **watered**, individually.

Plants on **Minigarden® Vertical** can be watered manually, with the help of a simple watering can, or Minigarden's own innovative watering can, which can be used both to water and to supply nutrition to your plants ([for more information, please go to page 58](#)).

For larger ensembles, with greater dimensions, or a more convenient and autonomous usage, install the Drip Irrigation Kit, which is exclusive to **Minigarden® Vertical** ([for more information, please go to page 34](#)).

To ensure the good nutrition of plants on **Minigarden® Vertical**, we offer a range of nutritional supplements, Minigarden Grow Up, which should be diluted in the water used to irrigate the plants ([for more information, please go to page 52](#)).

## 3- Minigarden® Corner

---

# What it is

**Minigarden® Corner** is a follow-up on the original product, the Minigarden® Vertical.

**Minigarden® Corner** not only allows to close the ends and create 90° connections in the Minigarden® Vertical, it also has countless uses as a standalone product.

As with the original product, the **Minigarden® Corner** is a modular system that allows the vertical growing of ornamental, aromatic and vegetable plants, it is also freestanding and self-draining, and can be installed inside or outside, depending on the plants grown.

**Minigarden® Corner** is the only available system in the market created for vertical gardening in corners.

In this cross-section, we can see how the modules fit into each other, as well as the substrate filling.

URBAN GREEN REVOLUTION

# Design and modularity

**Minigarden® Corner** system comprises only 4 easy to assemble parts: a lid, 2 circular clips, a central recipient with 1 cavity and a base tray.

The assembly is very simple and the possibilities are limitless. Its modular features allow you to stack it, both vertically and horizontally, in a simple way, creating countless combinations (90°, 180°, 270° and 360°).

**Minigarden® Corner** can be installed inside or outside, in wall corners or window-sills, on benches or pieces of furniture, hanging from walls and in many other ways, depending on your creativity.

# Design and modularity

**Minigarden® Corner** can also be used in conjunction with Minigarden Vertical, thus increasing the number of possible sets designed with these growing systems ([for more information, please go to page 27](#)).

Whenever needed, **Minigarden® Corner** can be secured to a wall with the help of **Minigarden Fixers**, which are placed through the round clips on the wall-facing side ([for more information, please go to page 61](#)). Alternatively, screws can be used instead.

URBAN GREEN REVOLUTION

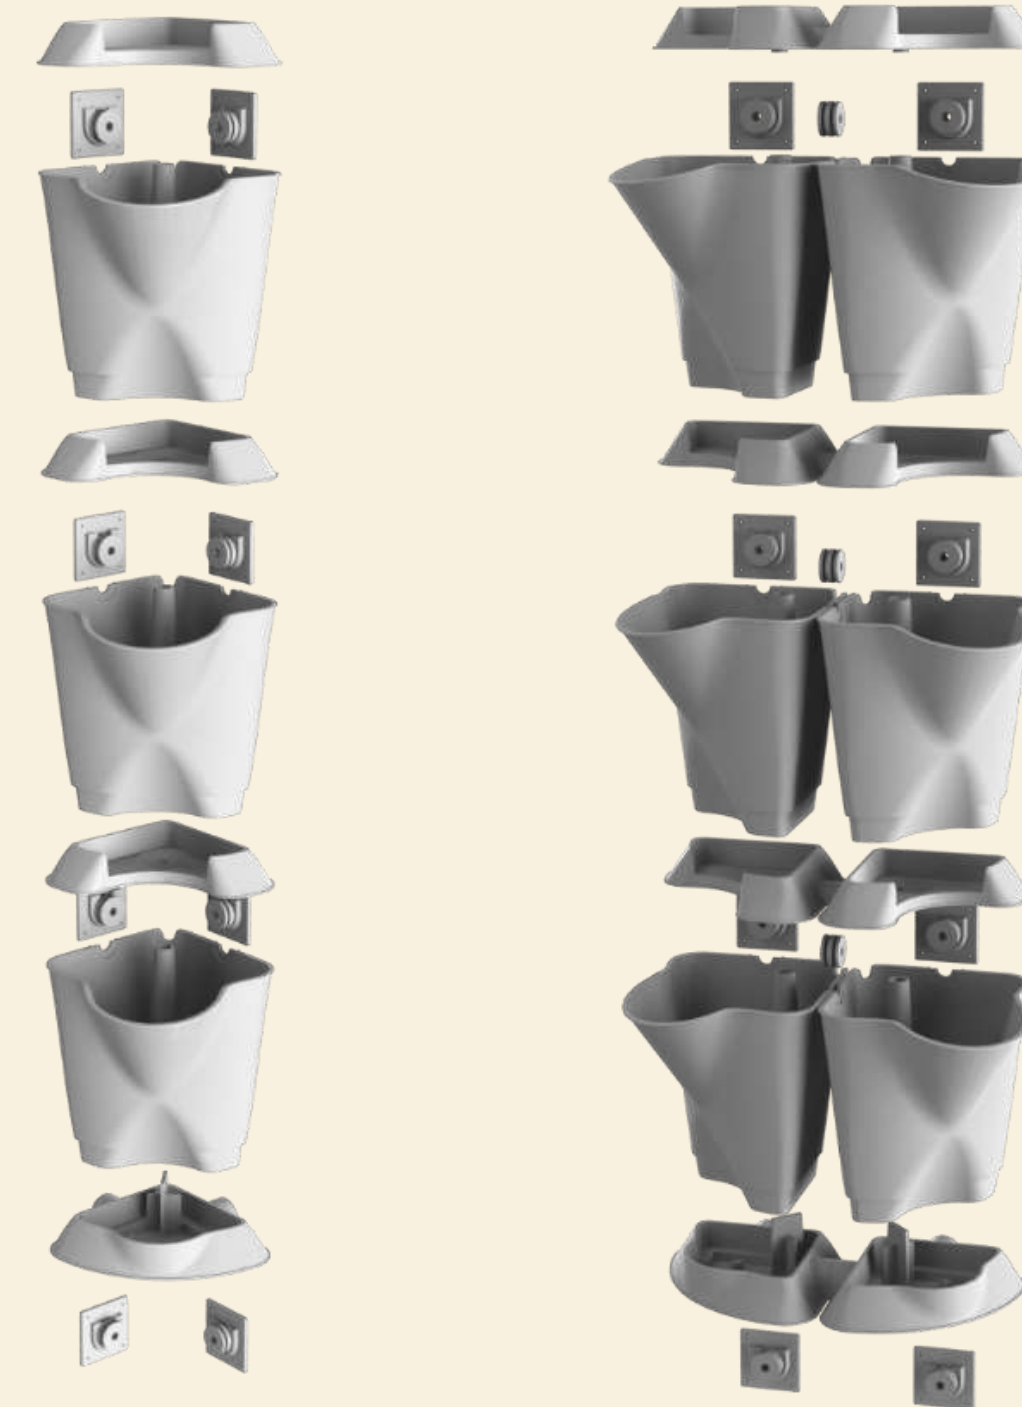

# Design and modularity

Wall Support for Minigarden Corner is a new accessory designed to hang **Minigarden® Corner** on a wall ([for more information, please go to page 67](#)).

We suggest the use of 1 Wall Support base tray to hang up to 3 modules, and 2 base trays for up to 6 modules (in a configuration of 2 columns with 3 modules each, set as a 180° half moon).

URBAN GREEN REVOLUTION

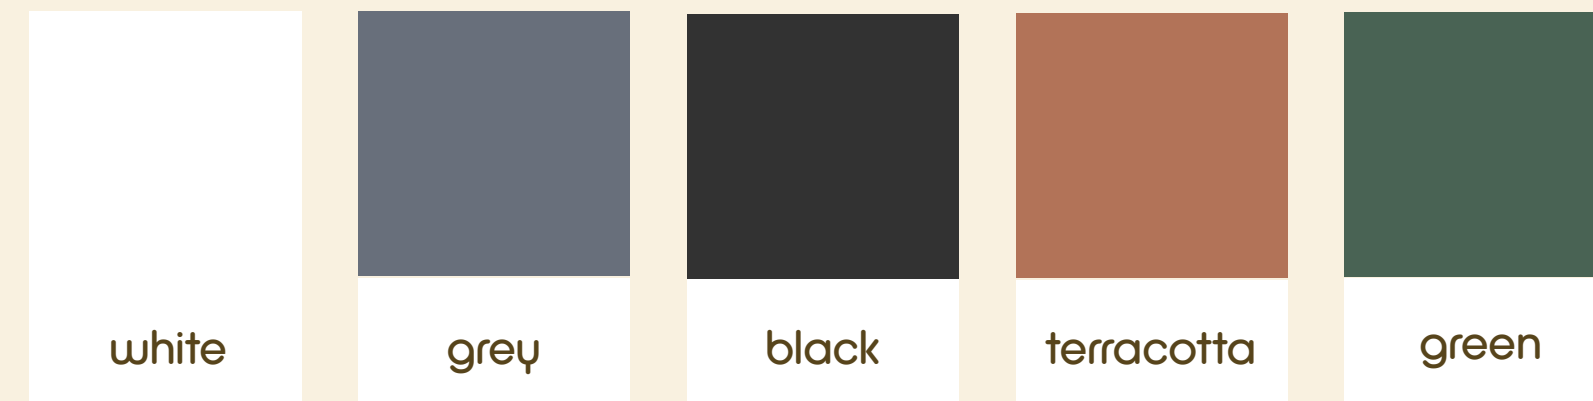

# Sustainable and durable

The ways in which Minigarden systems are combined are only limited by your imagination. Besides its modular features, you can also play with different plants and colours. On top of this, plants are easily replaceable after **Minigarden® Corner** instalation.

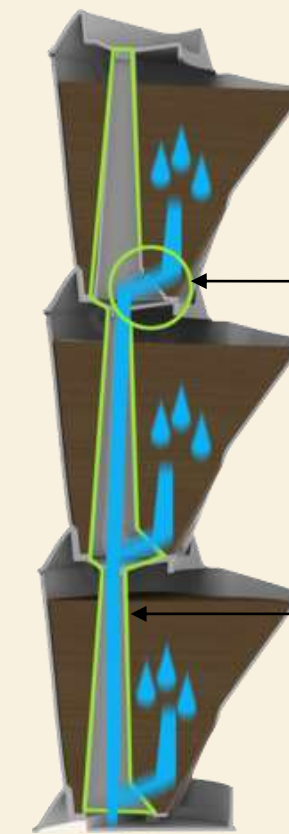

**Minigarden® Corner** is also made of high resistance polypropylene copolymer and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in 5 colours:

# Watering and nutrition

**Minigarden® Corner** was designed with an innovative gravitational drainage mechanism. This feature ensures that all excess irrigation water at the plants roots will be drained to the tray at the unit base. This system is very important to ensure planting sustainability in the long run.

Each recipient has a conic structure inside. At the bottom of the cone there are small grills through which the excess water runs to the lid directly below the corresponding module and, after that, to the tray at the assembly base.

main collector

For this reason, **all the plants** grown in the **Minigarden® Corner** need to be **watered**, individually.

Plants on **Minigarden® Corner** can be watered manually, with the help of a simple watering can, or Minigarden's own innovative watering can, which can be used both to water and to supply nutrition to your plants ([for more information, please go to page 58](#)).

For larger ensembles, with greater dimensions, or a more convenient and autonomous usage, install the Drip Irrigation Kit, which is exclusive to **Minigarden® Corner** ([for more information, please go to page 36](#)).

To ensure the good nutrition of plants on **Minigarden® Corner**, we offer a range of nutritional supplements, Minigarden Grow Up, which should be diluted in the water used to irrigate the plants ([for more information, please go to page 52](#)).

## 4- Minigarden® Vertical & Corner

---

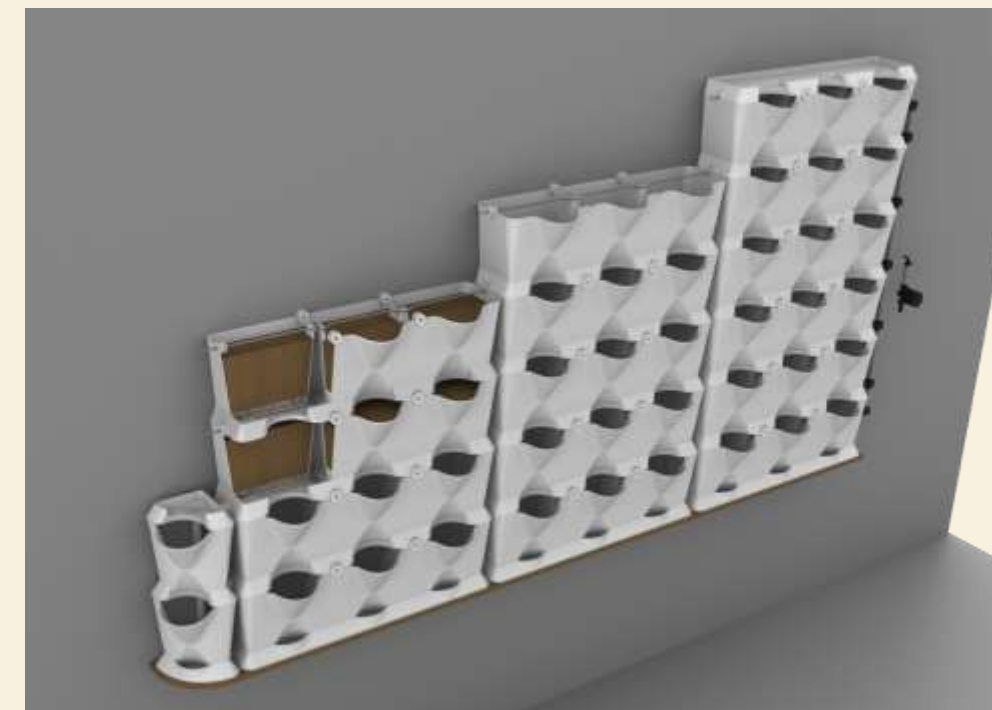

# Design and modularity

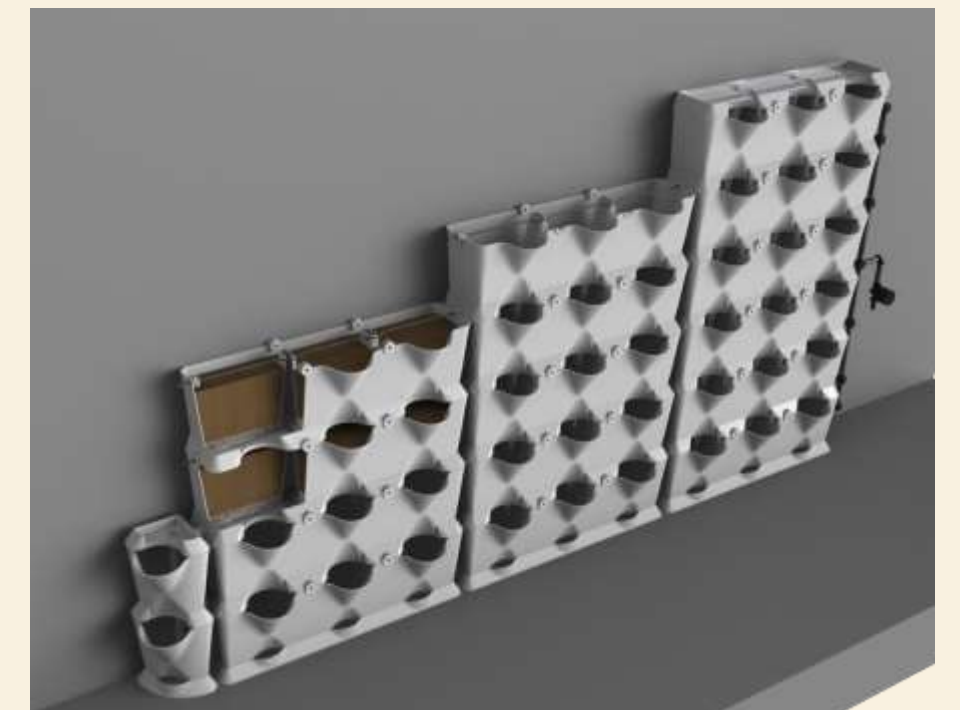

The combined use of the **Minigarden® Vertical** and the **Minigarden® Corner** brings about a real revolution in the world of vertical cultivation module systems.

The interconnection possibilities of the two products are huge.

The ends of the **Minigarden® Vertical** can be finished with plants through longitudinal connections with the **Minigarden® Corner**.

Wall-hanging Minigarden® Vertical assembly finished in one end with Minigarden® Corner

Floor-standing Minigarden® Vertical assembly finished in one end with Minigarden® Corner

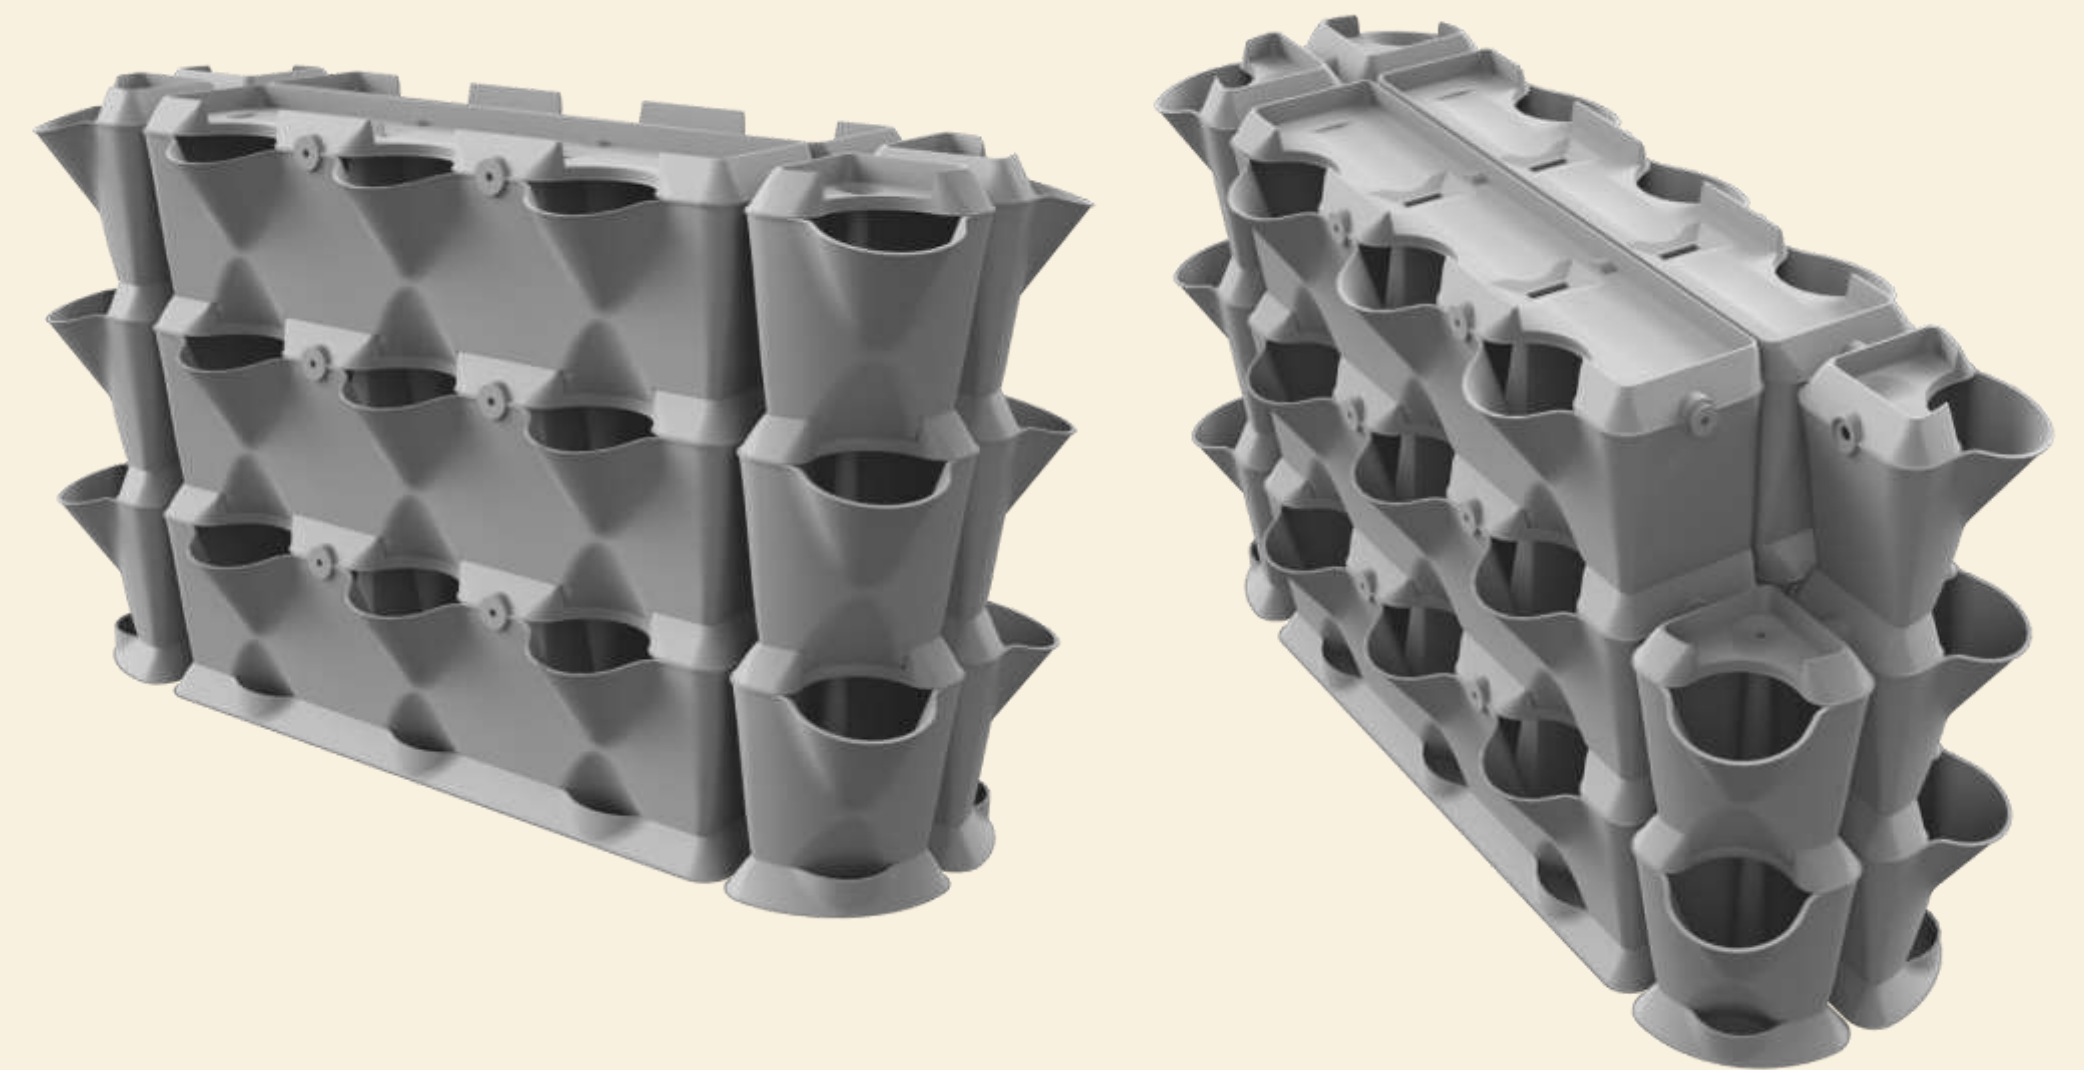

# Design and modularity

The ends of back-to-back assemblies of the **Minigarden® Vertical** can be finished with plants through longitudinal connections with the **Minigarden® Corner**.

This kind of freestanding assembly can be made higher, by stacking more **Minigarden® Vertical** and **Minigarden® Corner** modules, or longer, by using more **Minigarden® Vertical** module columns.

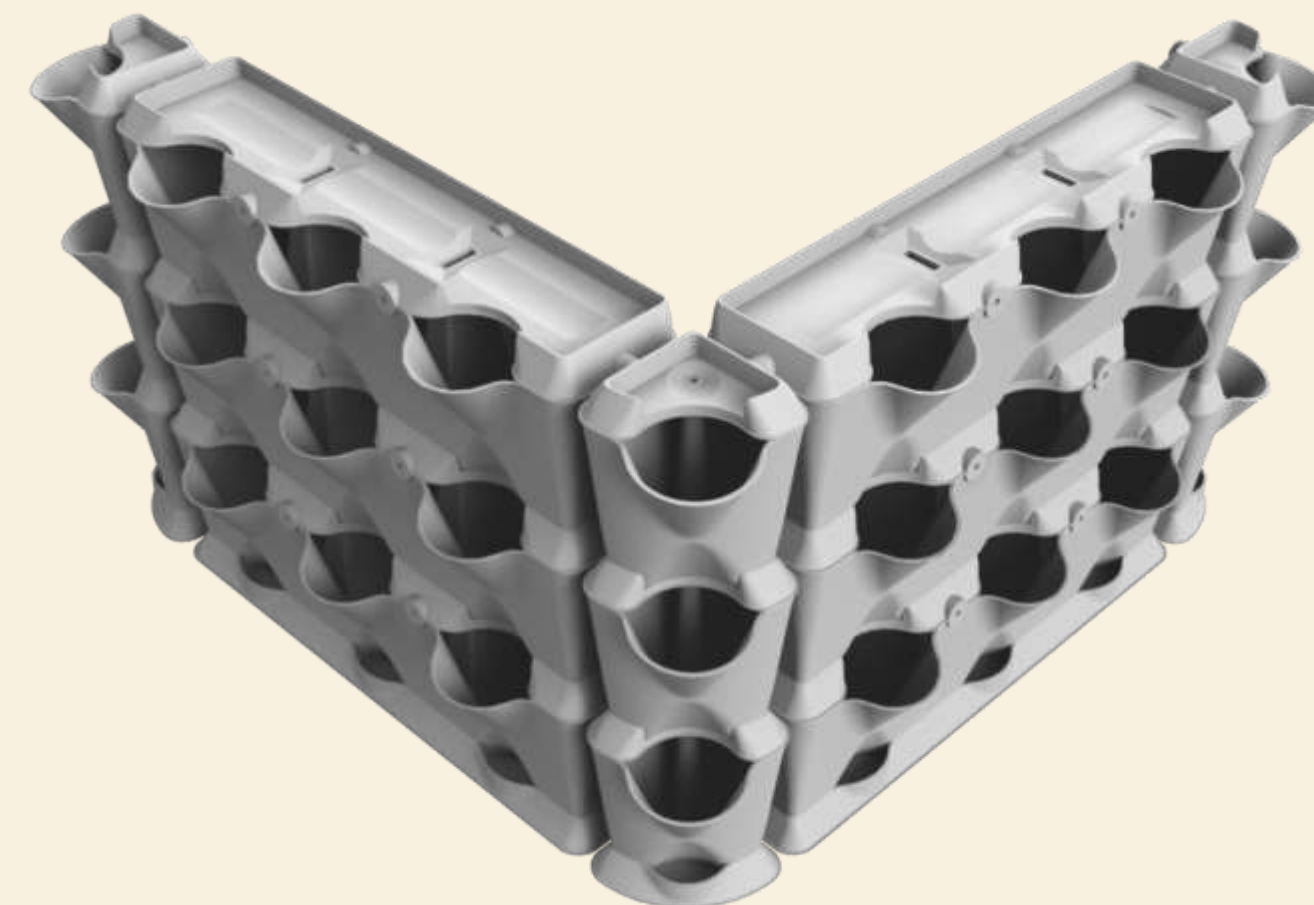

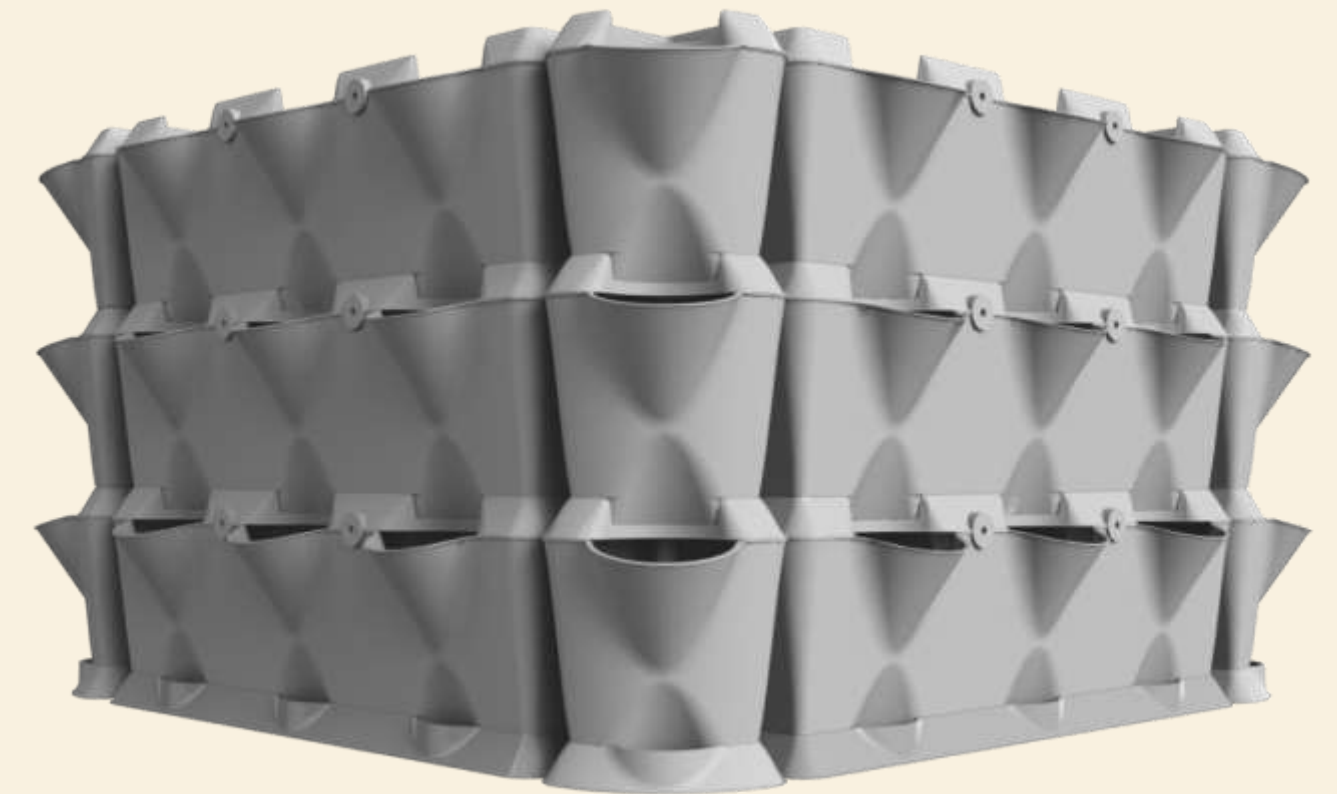

It can be used to divide spaces, both outdoor (esplanades) and indoor (offices), in the form of plant partitions.

# Design and modularity

The simple **Minigarden® Vertical** assemblies mounted in 90° vertical planes can now be connected with the **Minigarden® Corner**. This kind of setting will additionally guarantee greater stability in the **Minigarden® Vertical** assemblies.

# Design and modularity

Finally, we suggest square or rectangular freestanding assemblies, in which all the outside surfaces are covered with plants.

---

# 5- Minigarden® Micro Irrigation Solutions

---

# Introduction

Good watering is critical to the growth and health of the plants. The plants grown in the **Minigarden® Vertical** and **Minigarden® Corner** are no exception.

The innovative gravitational drainage system of the Minigarden® Vertical and Corner solves the problem of excess water (from rain or irrigation). Any excess water, resulting from the saturation of the substrate, is drained directly to the base tray at the bottom of the setup.

This drainage technology eliminates the passing of any excess water from the plants in the top modules to the plants in the bottom ones, essential factor to guarantee the growth and survival of healthy plants.

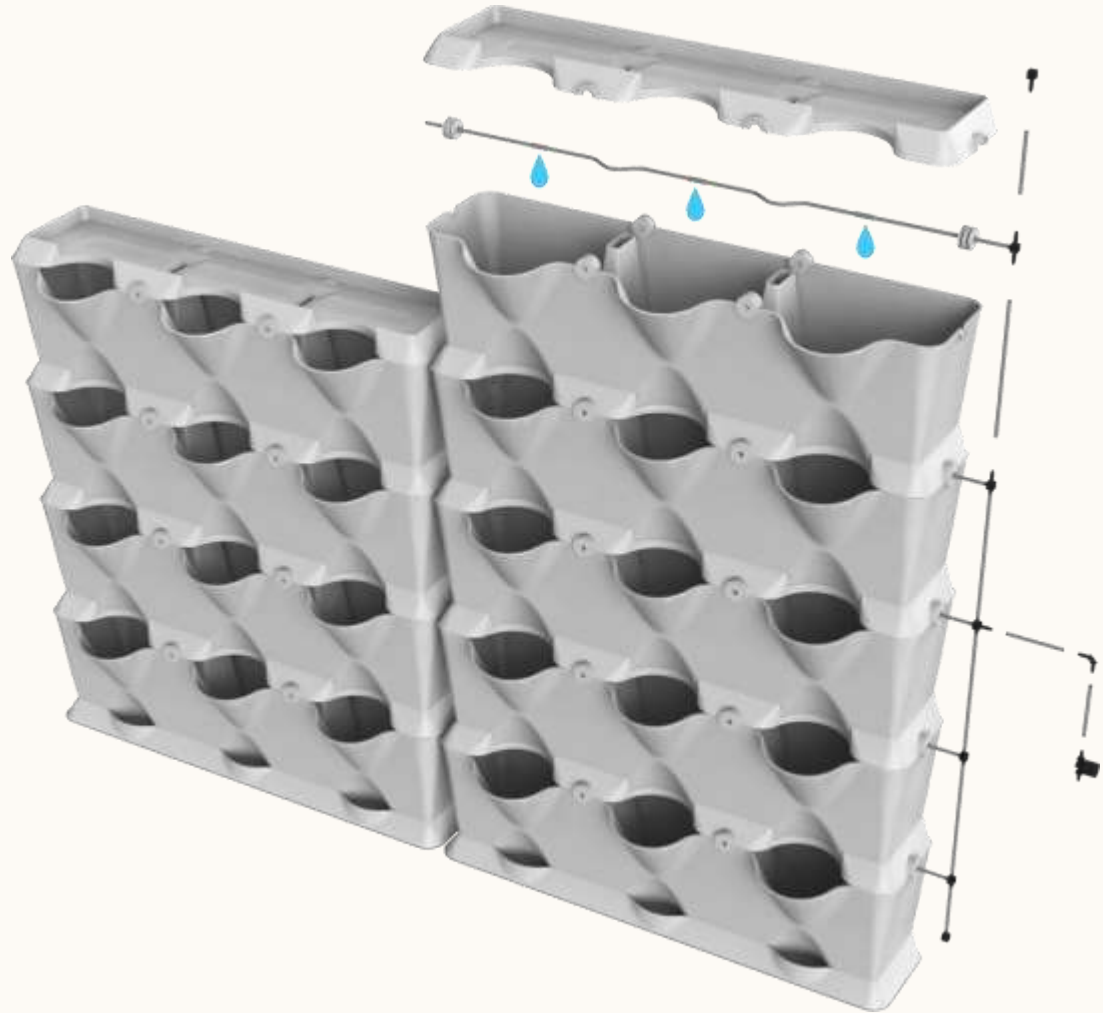

For this reason, **all the plants** grown in the **Minigarden® Vertical** and **Minigarden® Corner** need to be watered.

The **Minigarden® micro irrigation system**, intuitive and easy to use and automate, makes watering easy and convenient. By integrating a fertilizer dispenser device, the plant nutrition becomes a simple and efficient task.

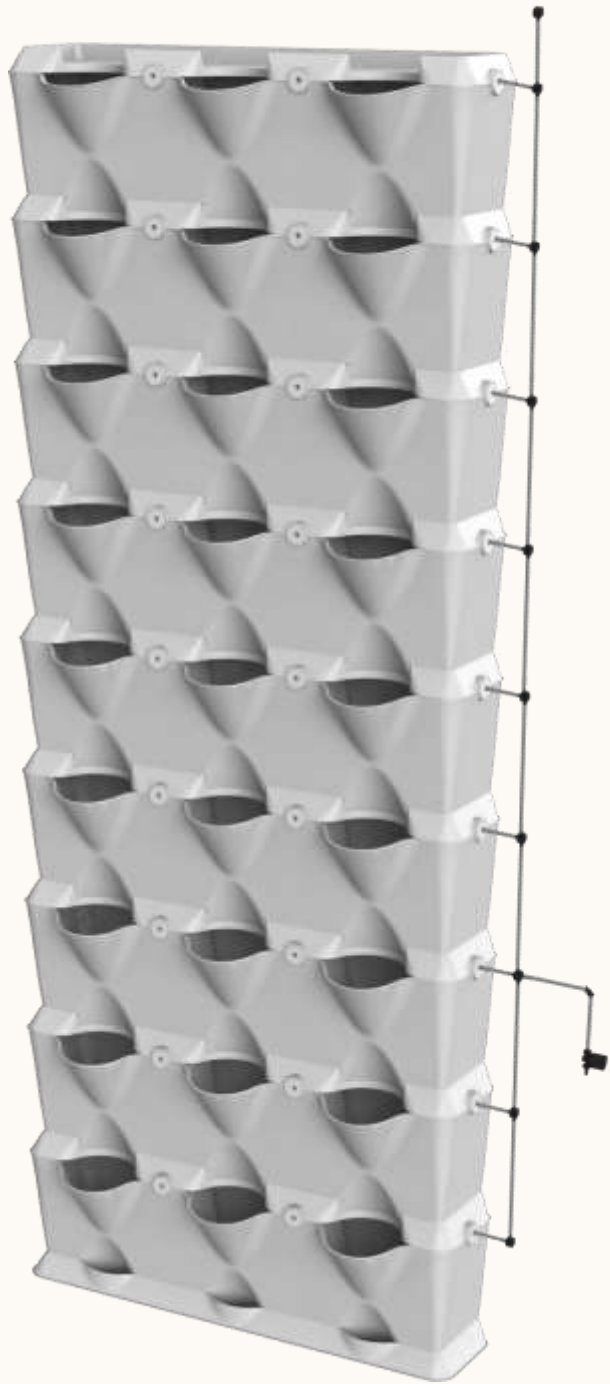

These features give the Minigarden the ability to re-create the best natural airing and moisture conditions.

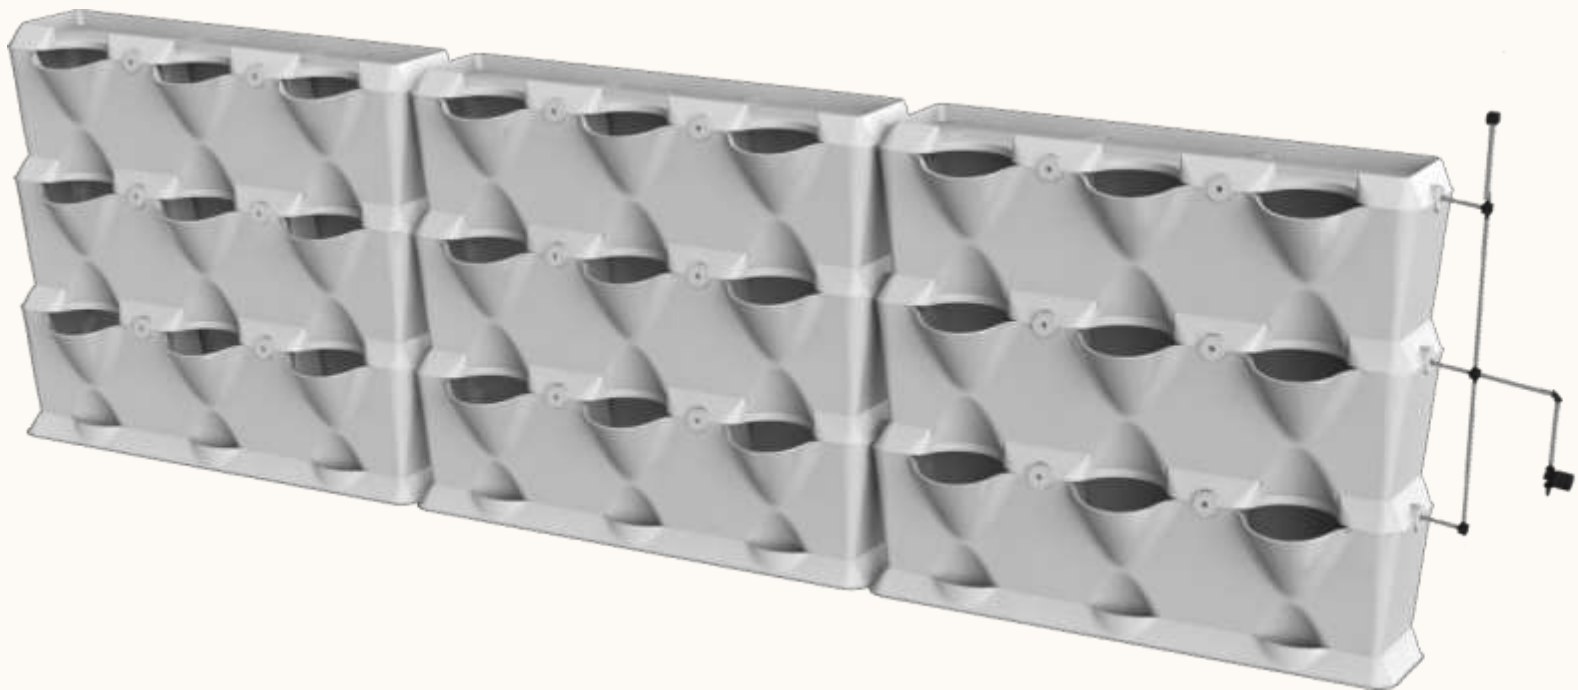

4/5X2

9X1

3X3

# Irrigation Kit Minigarden Vertical

The new **Irrigation Kit for Minigarden Vertical** consists of a drip watering solution specially designed for the Minigarden Vertical.

Simple and intuitive to install, it includes micro tubes with drip feeders and connectors for different configurations of up to 9 Minigarden Vertical modules (27 plants).

The solution is scalable up to 3 kits, allowing the irrigation of up to 27 modules (81 plants).

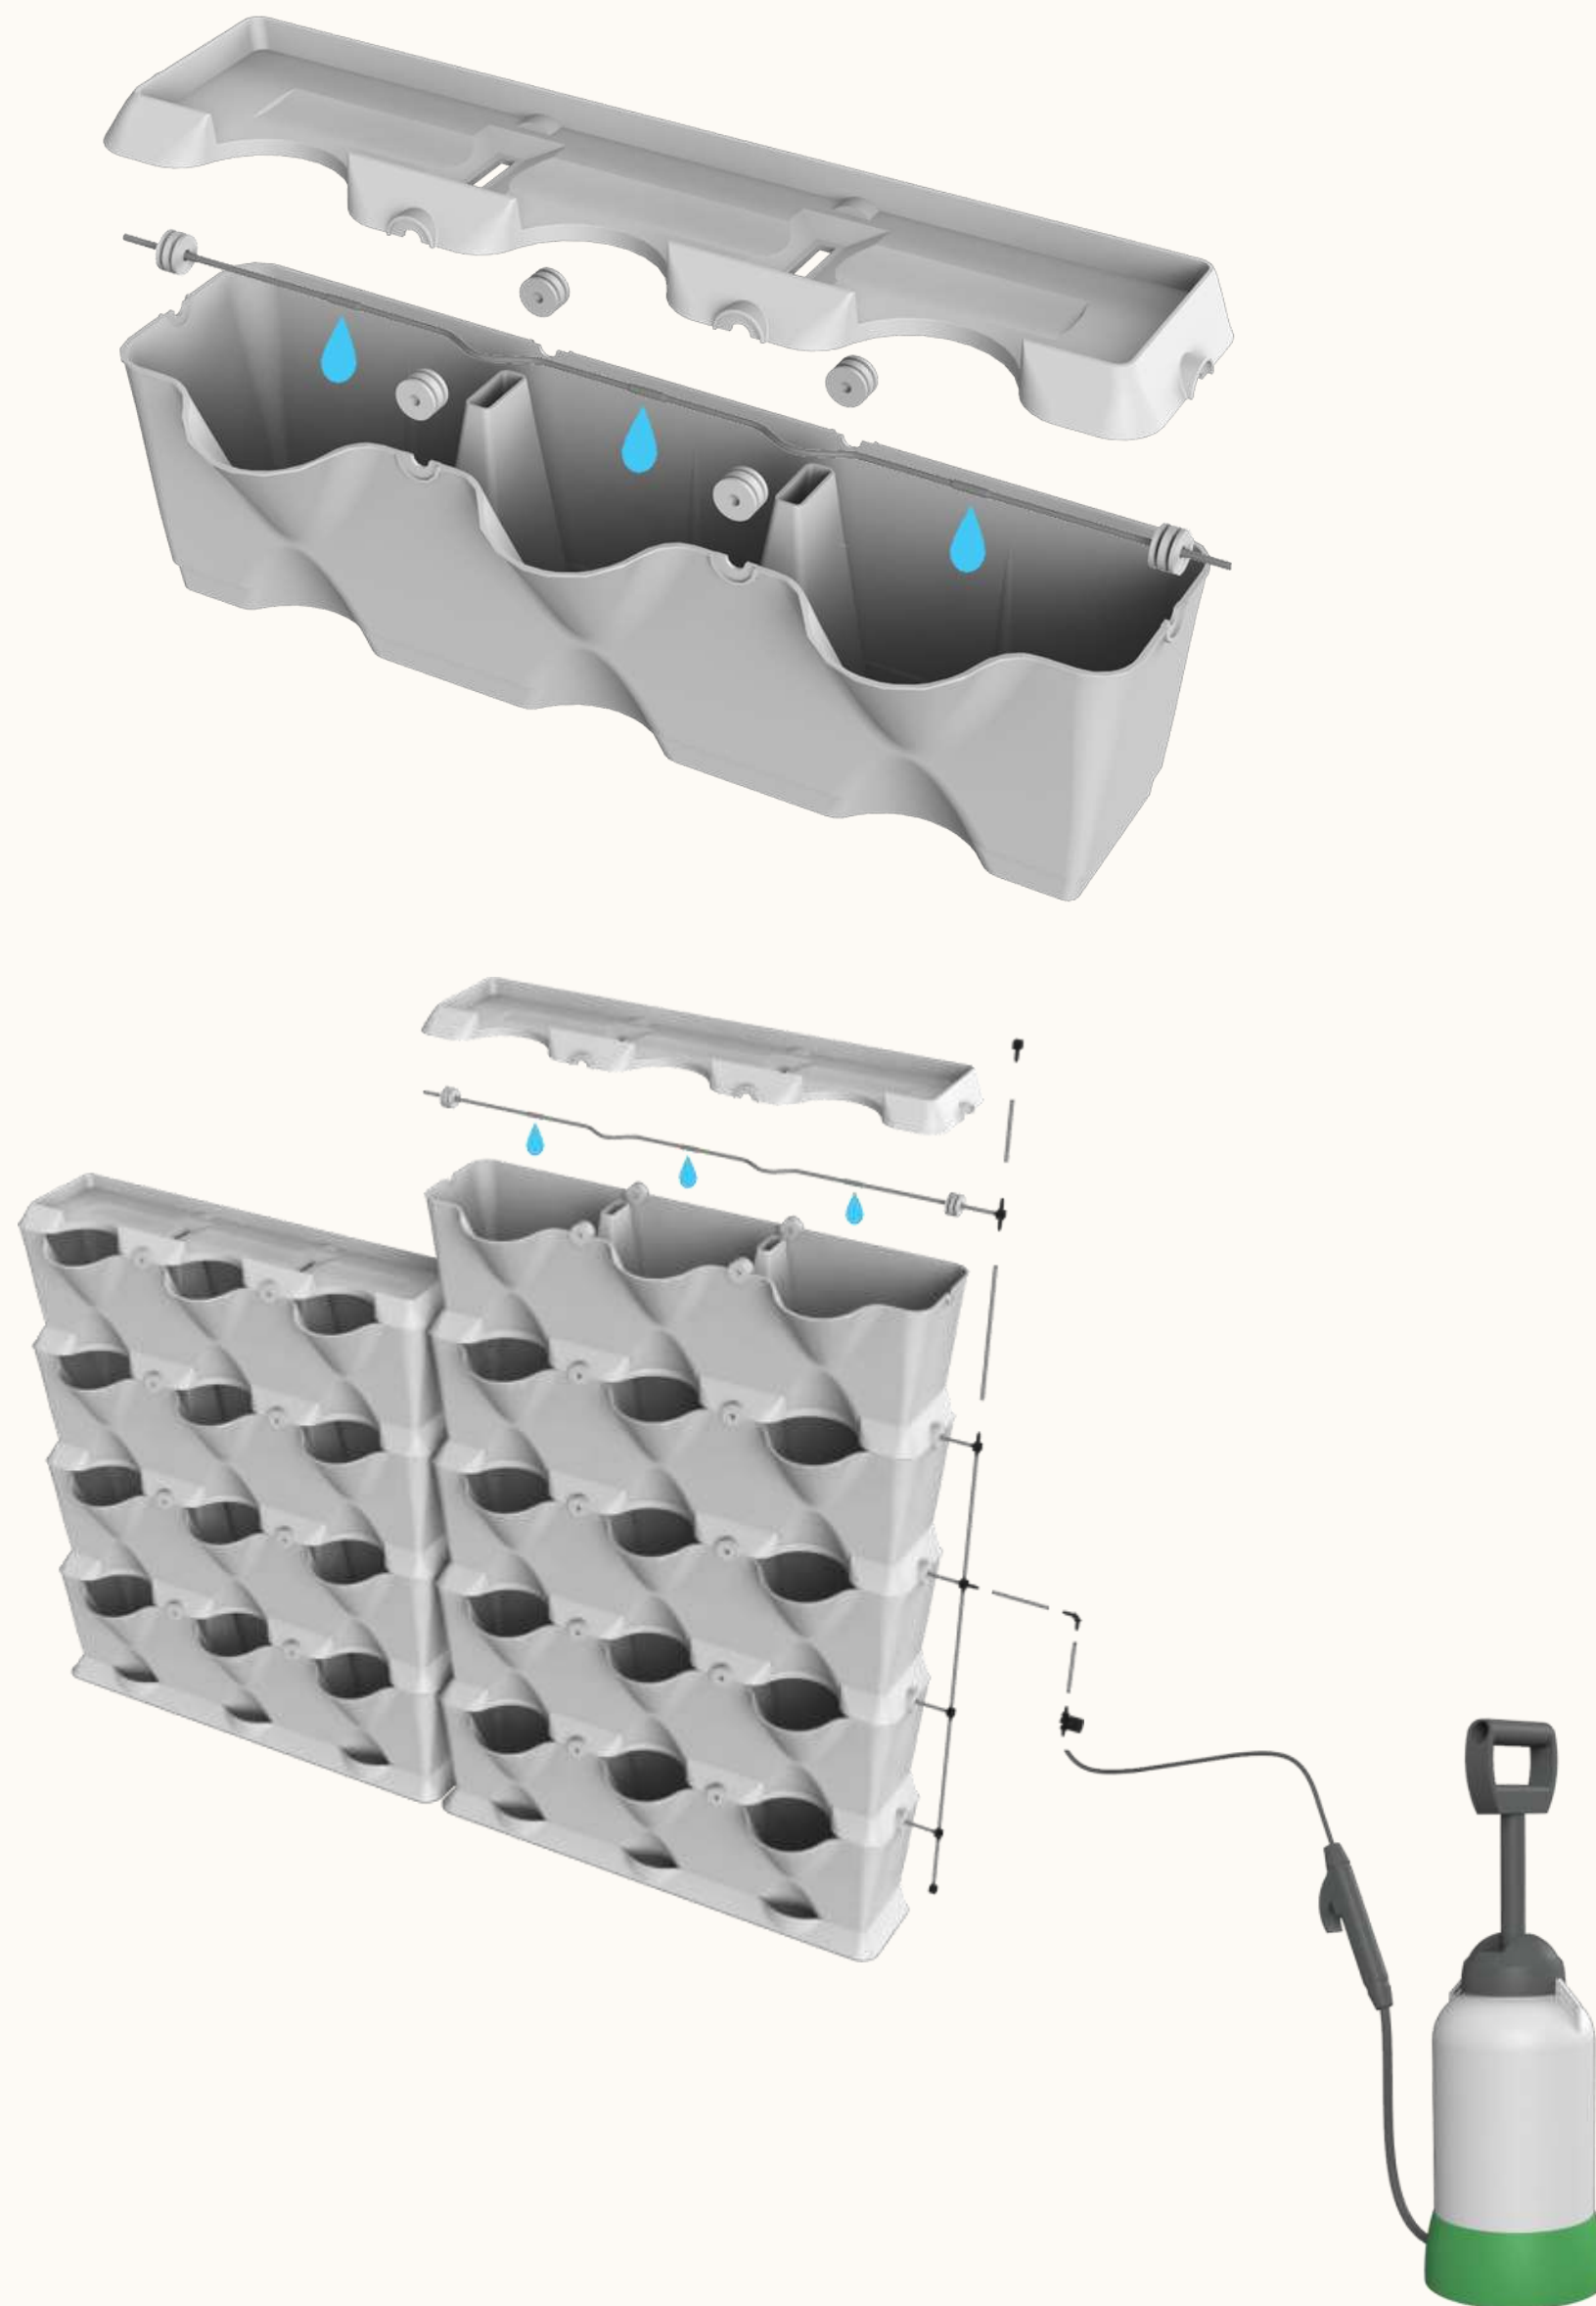

# Irrigation Kit Minigarden Vertical

The irrigation system is composed of a mini drip pipe with outer diameter of 6.5 mm with 3 drippers incorporated, which is placed inside each module, passing through the inner hole on the circular clip (Ø inner 9 mm) that connects the modules, with the tube being completely hidden.

Once the irrigation system has been assembled, a manual (5L) sprayer should be used, which will have to be adapted to the 1.5m tube (included) to perform the drip irrigation.

In situations where the user wishes greater convenience and autonomy, the irrigation kits may be automated and connected directly to the main water supply. To do this, a programmer, a fertilizer dispenser and a filter/pressure regulator will also be required.

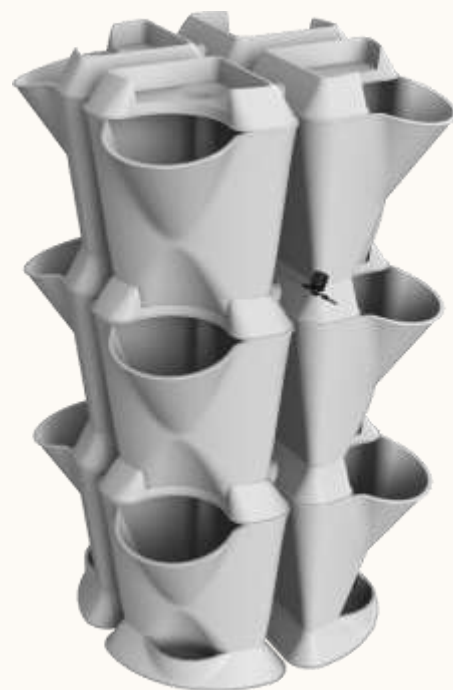

6X2

3X4

12X1

# Irrigation Kit Minigarden Corner

The new **Irrigation Kit for Minigarden Corner** consists of a drip watering solution specially designed for the Minigarden Corner.

Simple and intuitive to install, it includes micro tubes with drip feeders and connectors for different configurations of up to 12 Minigarden Corner modules (12 plants).

The solution is scalable up to 3 kits, allowing the irrigation of up to 36 modules (36 plants).

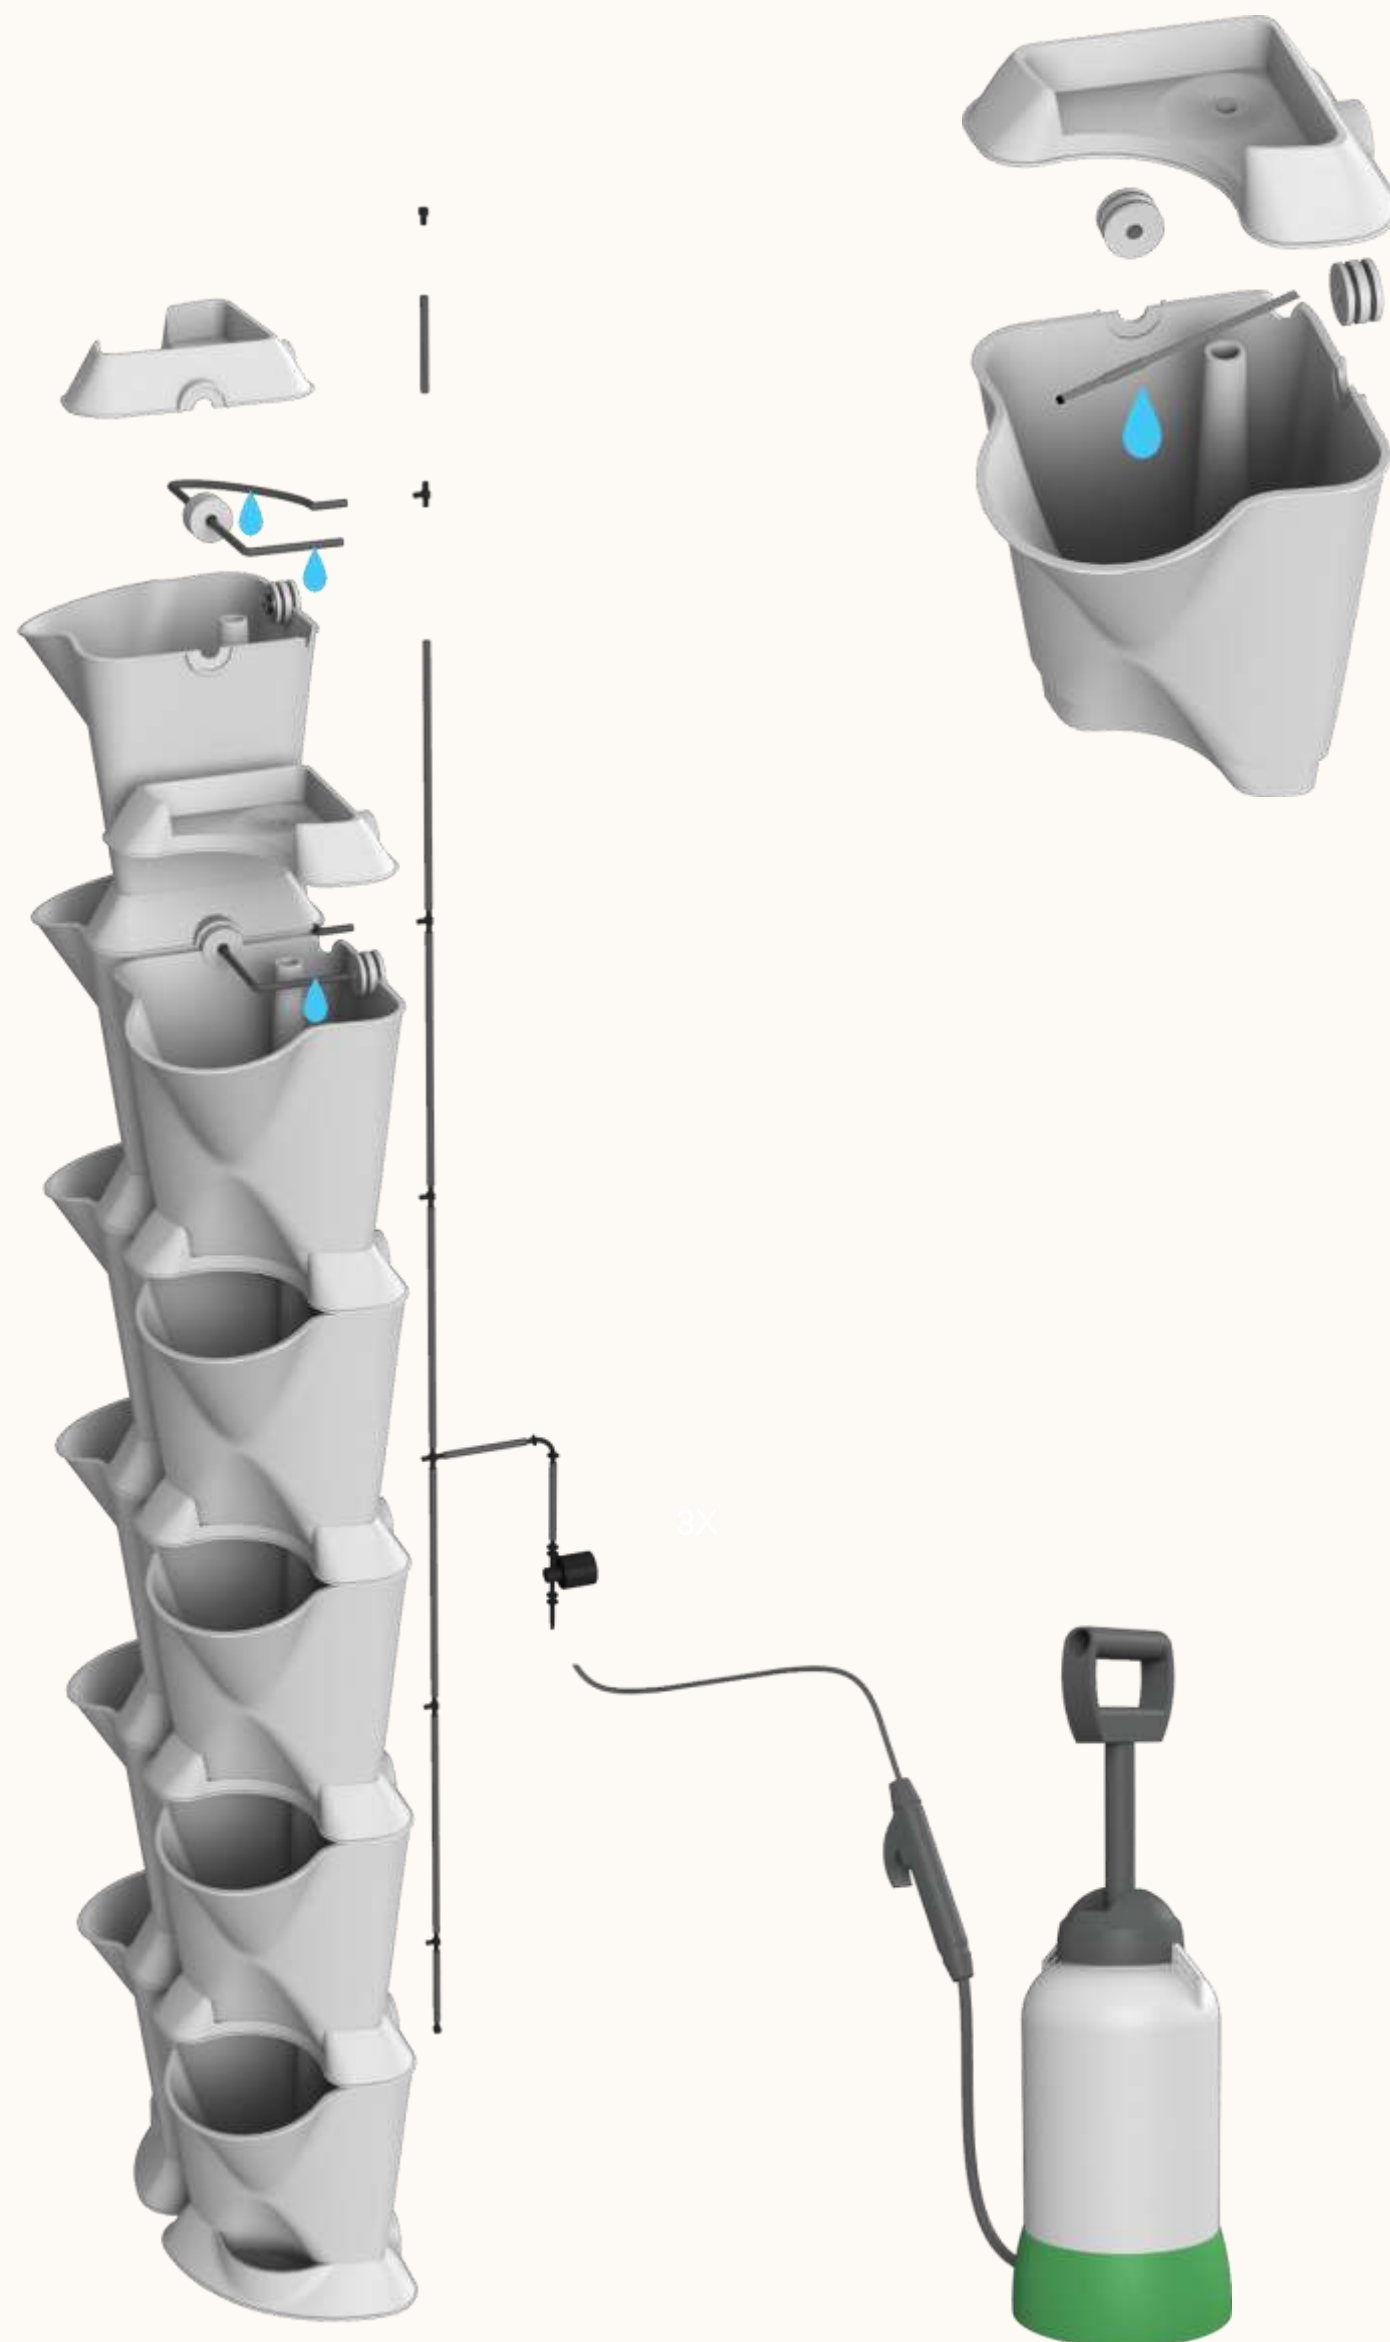

# Irrigation Kit Minigarden Corner

The irrigation system is composed of a mini drip pipe with outer diameter of 6.5 mm with 1 dripper incorporated, which is placed inside each module, passing through the rear hole Minigarden Corner module or the inner hole on the circular clip (Ø inner 9 mm) that connects the modules, with the tube being completely hidden.

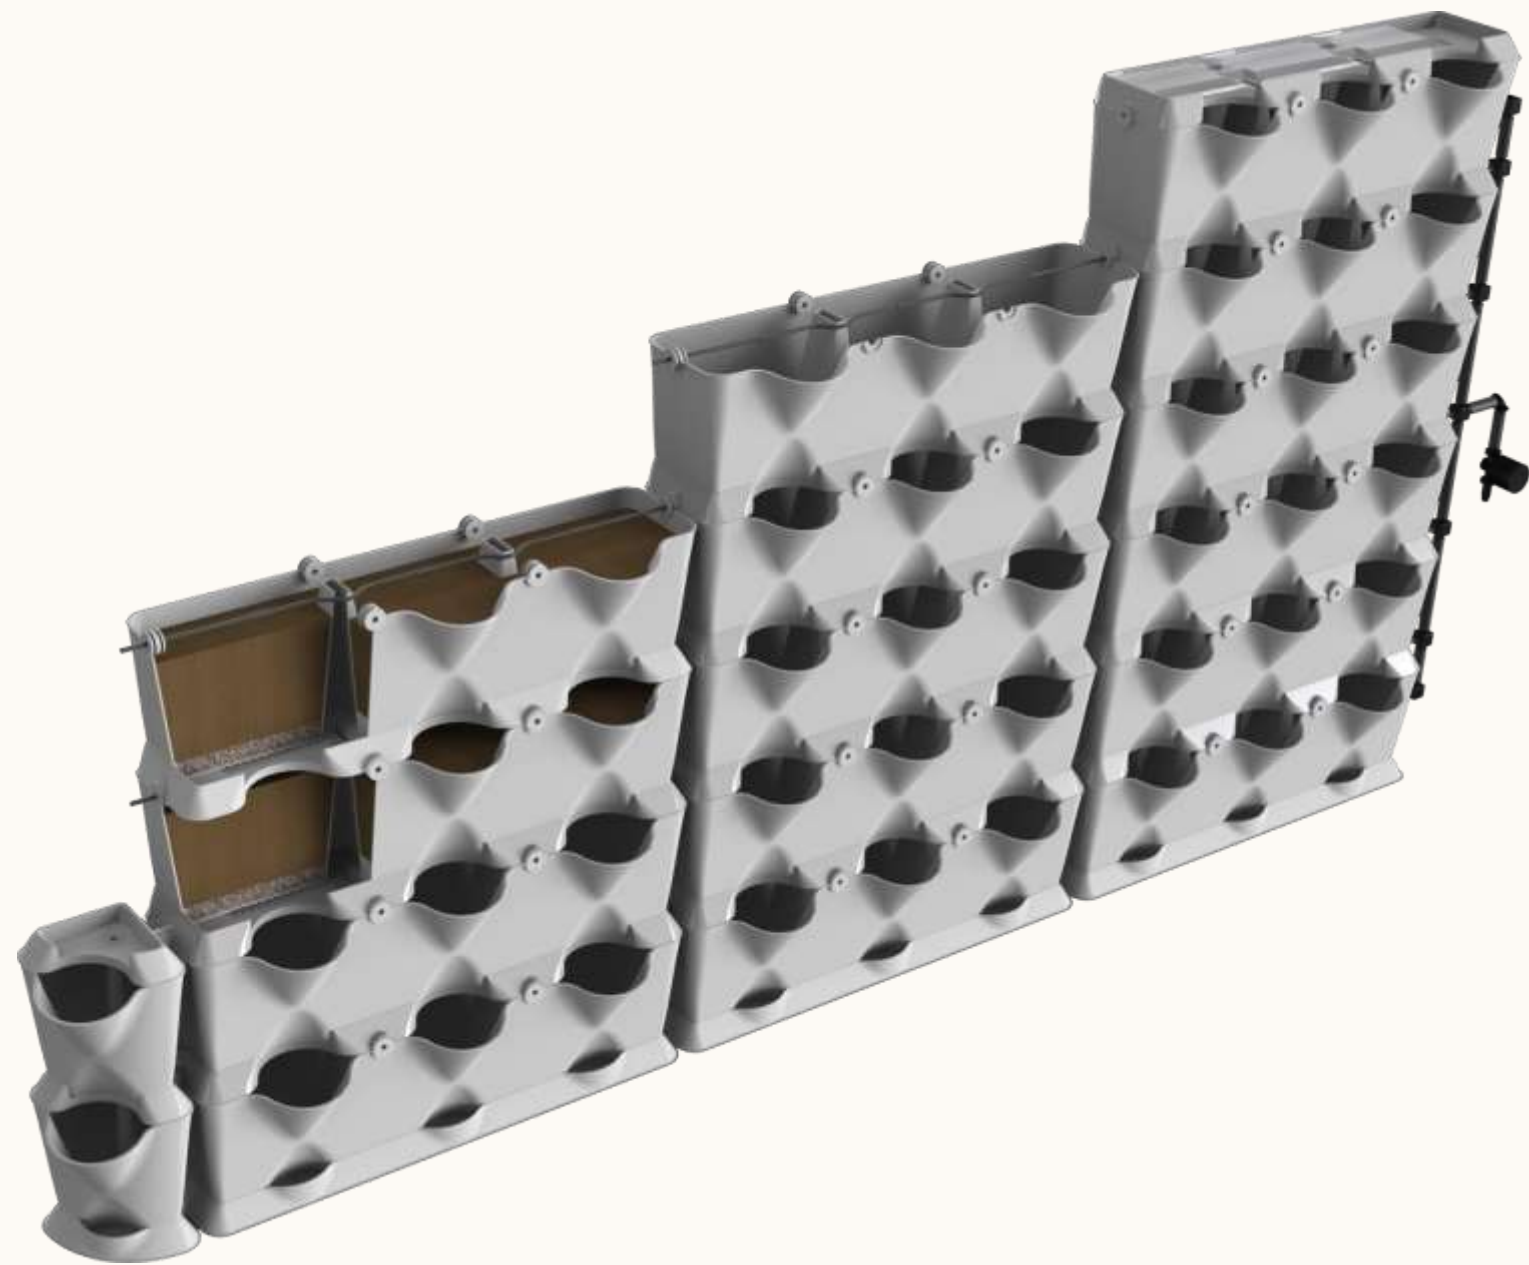

Once the irrigation system has been assembled, a manual (5L) sprayer should be used, which will have to be adapted to the 1.5m tube (included) to perform the drip irrigation.

In situations where the user wishes greater convenience and autonomy, the irrigation kits may be automated and connected directly to the main water supply. To do this, a programmer, a fertilizer dispenser and a filter/pressure regulator will also be required.

Example

# Irrigation Kit Minigarden Vertical & Corner

Additionally, the 2 types of irrigation kit may be combined to use the **Minigarden Vertical** in conjunction with the **Minigarden Corner**.

---

## 6- Minigarden® Basic

---

the perfect system for growing  
plants without lifting a finger

# What it is

**Minigarden® Basic** is the simplest and easiest system to use of the Minigarden family, designed thinking about urban living.

**Minigarden® Basic** is a plant growing system ideal for those starting out in gardening or for people who do not want to worry too much about the essential basic care needed for plants to grow, specifically irrigation and nutrition.

Thanks to an ingenious system for storing water with nutrients and irrigation, **Minigarden® Basic** allows ornamental plants, aromatic plants or vegetables to be grown and maintained without the need for the usual daily care, as the system ensures regular irrigation and nutrition according to the plants' needs.

**Minigarden® Basic** is the easiest and most efficient system on the market for looking after and growing plants successfully. There is no need for users to even dirty their hands when planting, just insert 2 normal pots containing the chosen plants and watch them grow.

‘Automatic’ irrigation and  
nutrition through a special  
reservoir included in the  
system

# Design and convenience

**Minigarden® Basic** is composed of just 7, easy to assemble components: a watertight platform at the base, 2 lids with a round opening into which the pots are inserted, a round base to support the reservoir, a removable reservoir for water and nutrients, a feeder lid and a geotextile underlay to be placed inside the watertight platform.

For now, **Minigarden® Basic** is available in two sizes:

**Minigarden® Basic S** has a 1.25L water reservoir, and is suitable for pots of up to 12 cm in diameter. **Minigarden® Basic M** is perfect for larger plants. It has a 2.5L water reservoir and can fit pots of up to 16 cm in diameter.

basic s

basic M

URBAN GREEN REVOLUTION

# Design and convenience

**Minigarden® Basic** may be installed inside or in covered outdoor areas, on window sills, on tables, worktops and furniture, in kitchens, living rooms, bathrooms, offices, verandas, terraces, etc.

From installation to maintenance, **Minigarden® Basic** is so simple that any child could assemble and maintain it. It is a genuine “plug-and-play” growing system.

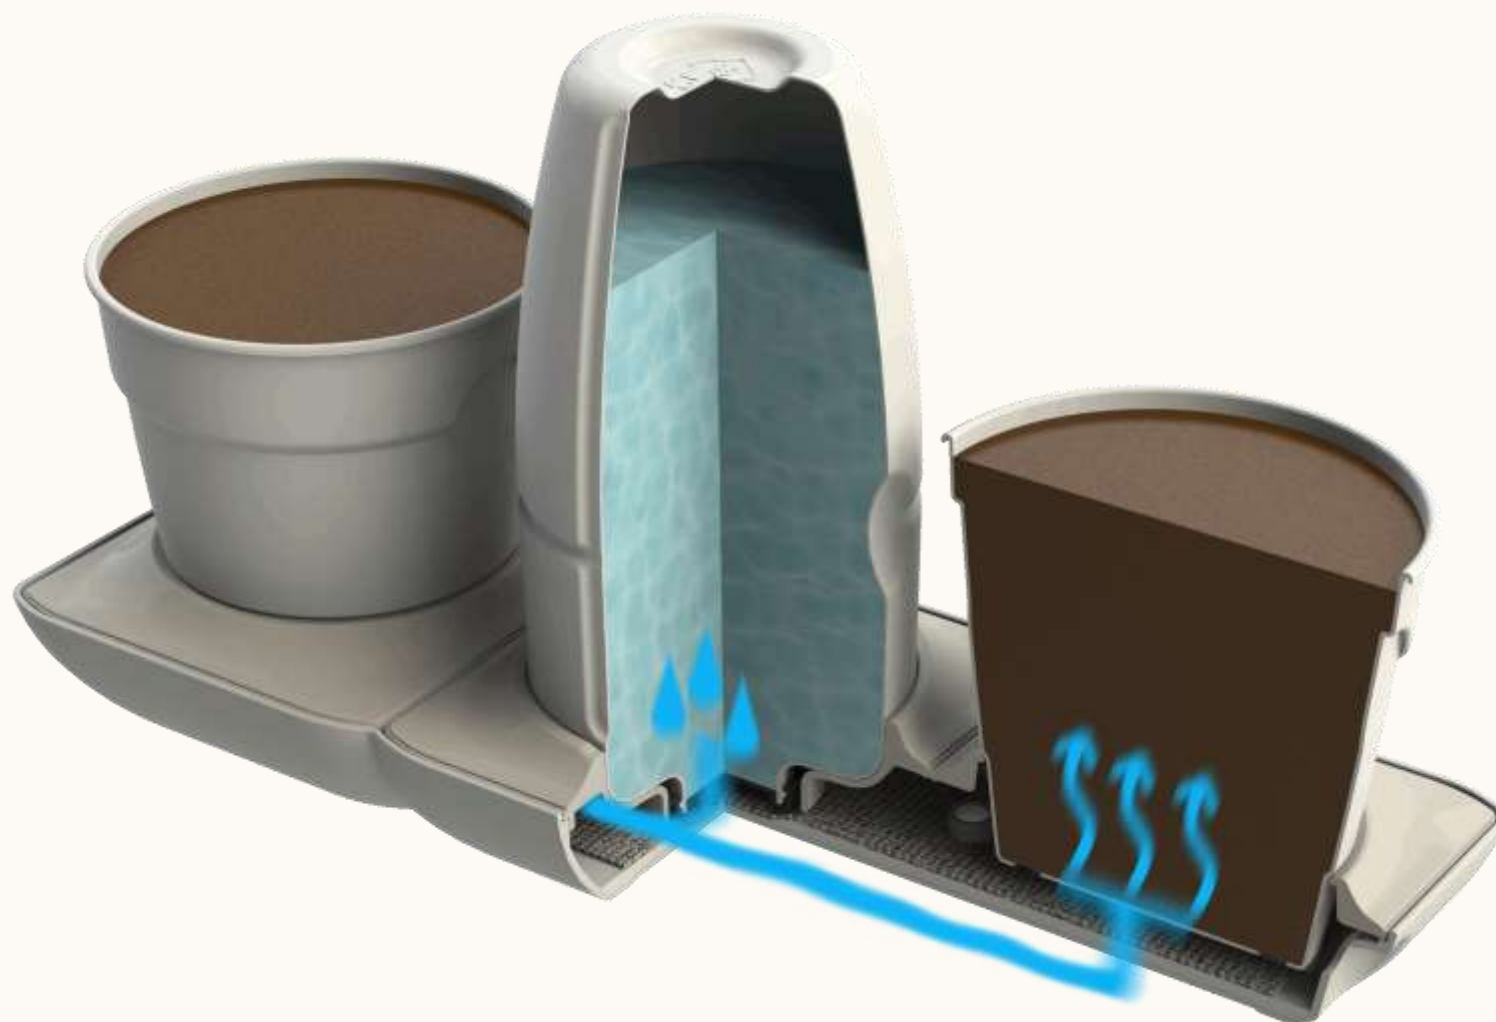

removable reservoir

automatic irrigation and feeding system

# Watering and nutrition

The unique and innovative design of the **Minigarden® Basic** includes an exclusive, 1.25 L or 2.5L removable reservoir which can be filled with water and a single dose of Minigarden® Grow Up nutrients ([for more information, please go to page 52](#)).

Once full, it is closed with the feeder lid and placed with the lid pointing downwards into the round base supporting the reservoir. The system is then ready for use.

The combination of the reservoir, the feeder lid and the geotextile underlay placed inside the watertight platform at the base of the **Minigarden® Basic** allow the plants in both pots to be irrigated and fed for long periods of time completely automatically.

Minigarden Basic S Pots

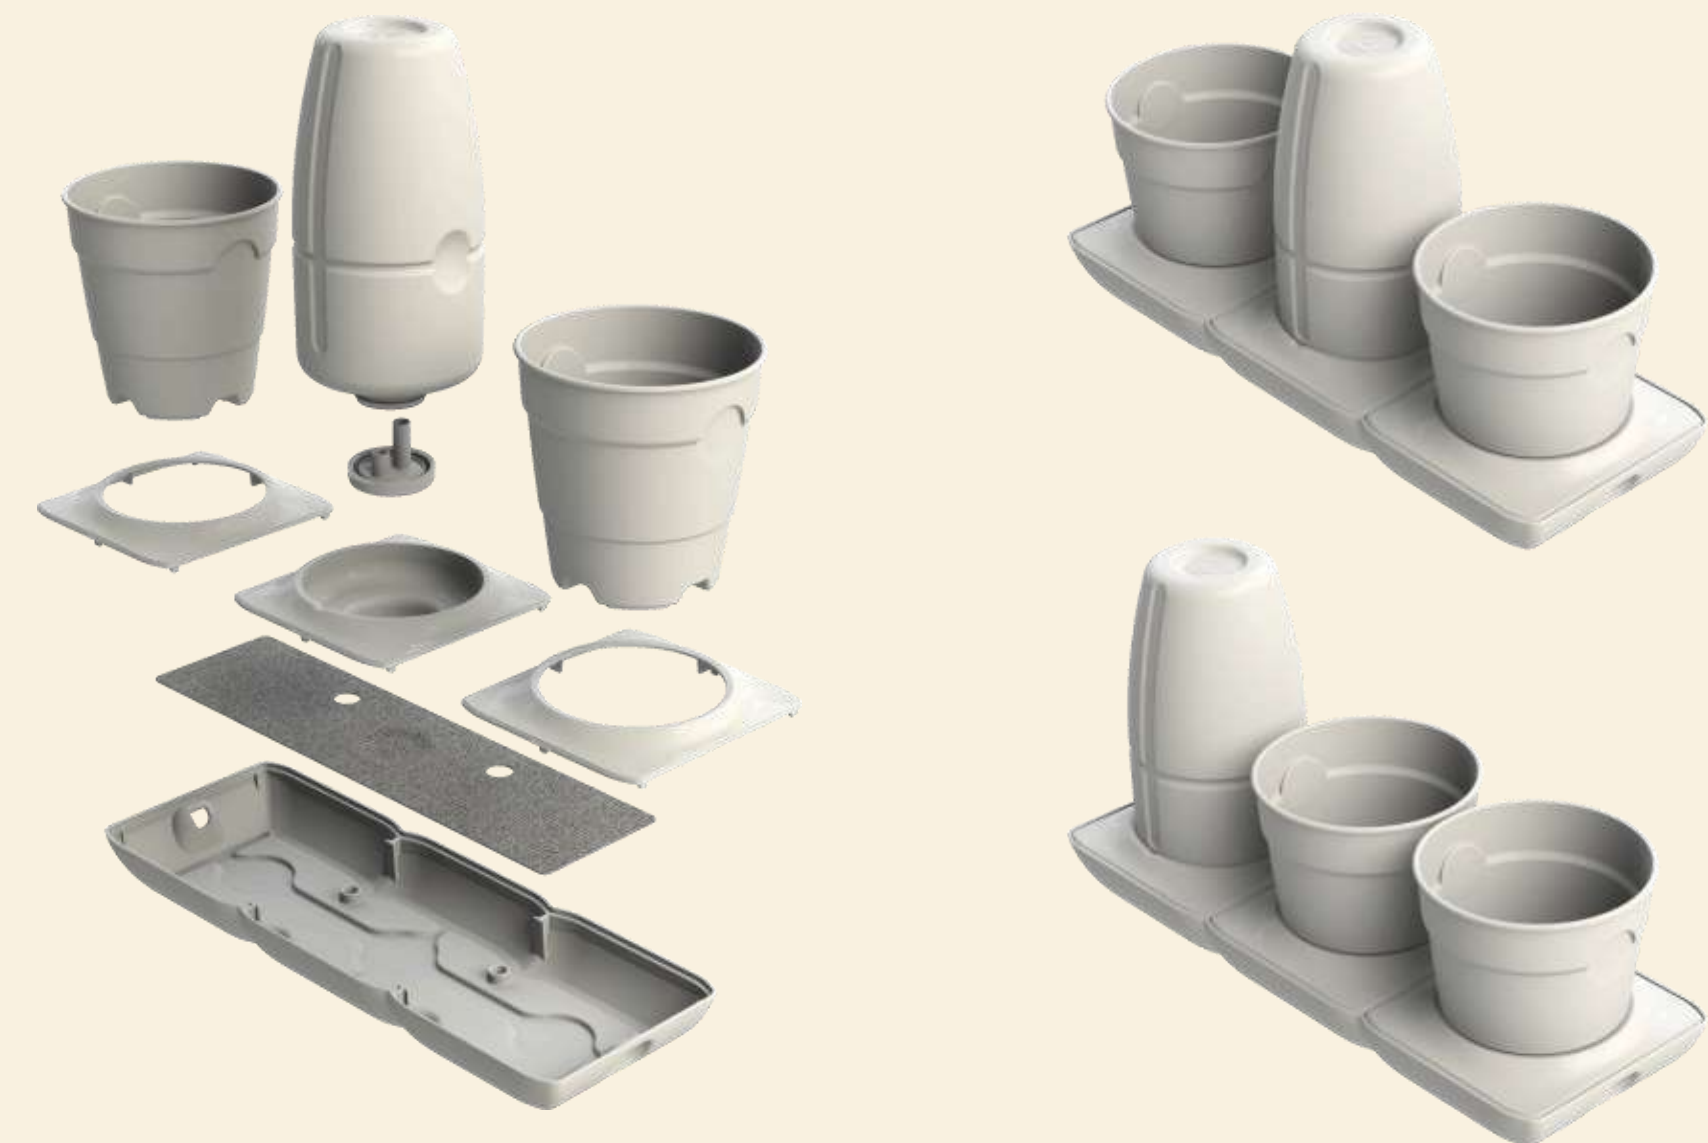

# Design and modularity

**Minigarden® Basic** is also a modular growing system with new features, configurations and accessories.

Our Basic Pots were specially developed for both **Minigarden® Basic** sizes, S and M.

**Minigarden® Basic S Pots** come with 2 pots of 12 cm in diameter and a capacity of 1 litre.

**Minigarden® Basic S Uno** come with 2 pots of 16 cm in diameter and a capacity of 2.25 litres.

Minigarden Basic M Pots

Assembly is extremely simple and intuitive, allowing 2 types of configuration: water reservoir in the middle, between pots, or on either side.

URBAN GREEN REVOLUTION

# Design and modularity

Basic Pot Uno is a carefully designed flowerpot with a larger plantation area, and a new configuration for **Minigarden® Basic**.

For now, this pot is only available for **Minigarden® Basic S** size.

**Minigarden® Basic S Uno** includes one flowerpot with a capacity of 2.8 litres.

# Design and modularity

Our Color Rings are covers for Minigarden® Basic S Pots and Minigarden® Basic S Uno that come in different colors and were created to bring life to your gardening system ([for more information, please go to page 73](#)).

color rings

URBAN GREEN REVOLUTION

minigarden®

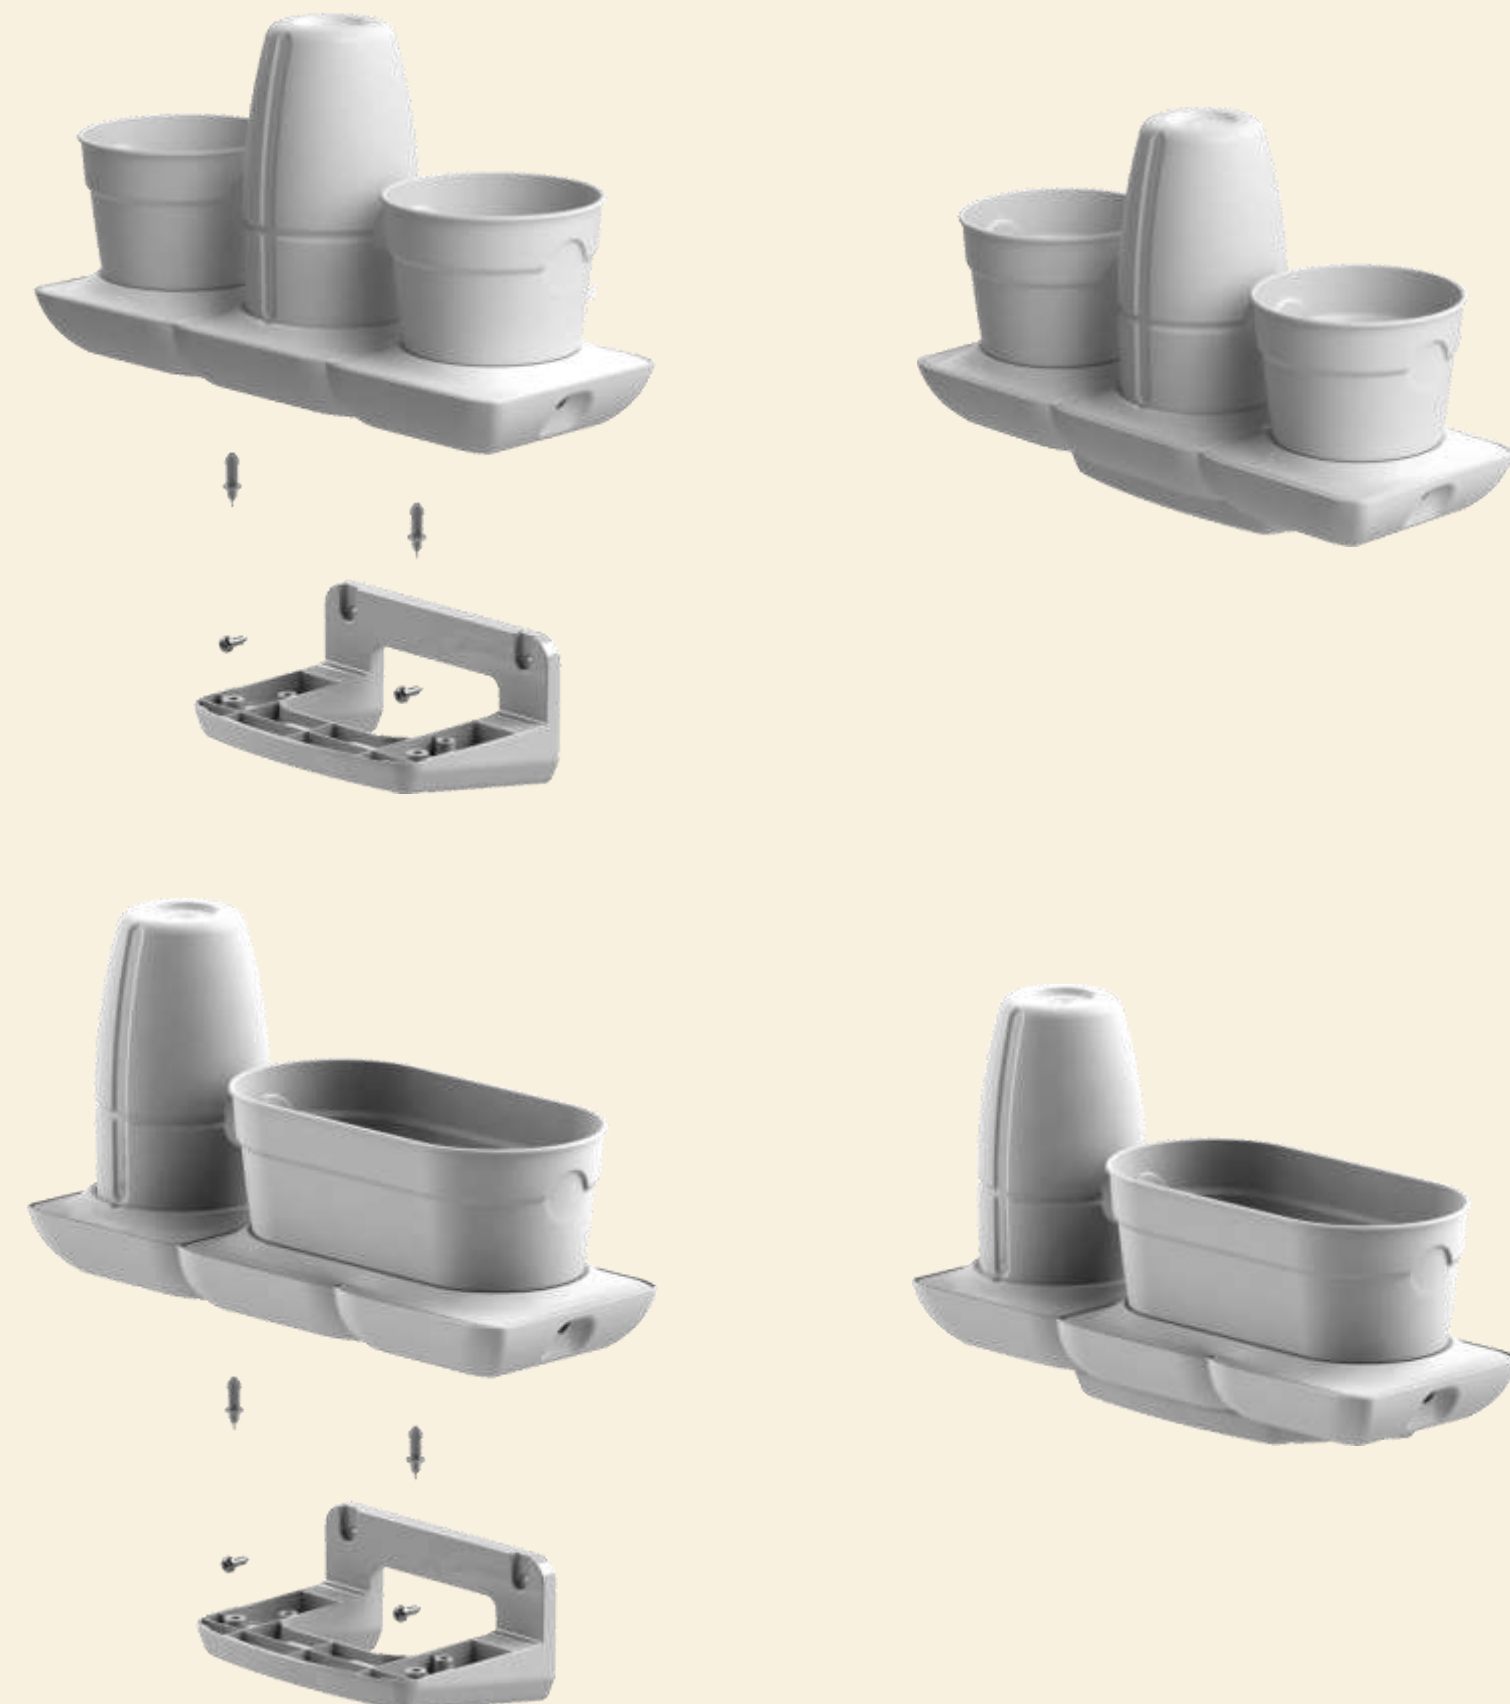

# Design and modularity

Wall Support for Minigarden Basic is a wall bracket suitable for both Minigarden® Basic sizes, S and M ([for more information, please go to page 70](#)).

With this accessory, all 3 models of Minigarden® Basic – Minigarden® Basic S Pots, Minigarden® Basic S Uno, and Minigarden® Basic M Pots – can be hung on a Wall.

URBAN GREEN REVOLUTION

minigarden®

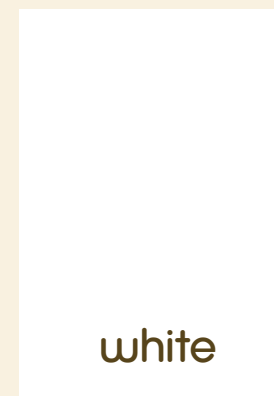

# Durability and simplicity

Build quality and durability are distinctive features of Minigarden® products.

Like Minigarden® Vertical and Minigarden® Corner, **Minigarden® Basic** is also made of high-strength polypropylene copolymer and contains additives to protect against UV rays, making it capable of withstanding extreme climatic conditions (solar radiation and temperatures), and is guaranteed to last for a period of not less than 10 years. It is also reusable and totally recyclable.

For now, **Minigarden® Basic** is only available in one colour, white, which in addition to looking good anywhere, highlights the beauty and colour of the plants themselves.

white

---

## 7- Minigarden® Grow Up & Bug Off

---

# What they are

As well as irrigation, the quality of nutrition is essential for the healthy growth of plants. Plants grown in the Minigarden® Vertical, Minigarden® Corner and Minigarden® Basic systems are no exception.

In this regard, the Minigarden® range of products now includes an innovative nutrition solution for different types of plants and uses, **Minigarden® Grow Up**.

**Minigarden® Grow Up** offers 3 solutions for plant nutrition, differentiated by the colours green, orange and brown:

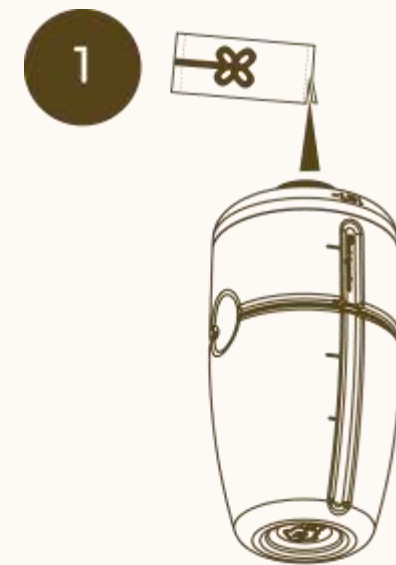

- **Minigarden® Grow Up Green**, a nutritional supplement for green plants containing all macro and micro nutrients necessary for plant growth in a formula that favours leaf growth.
- **Minigarden® Grow Up Orange**, a flowers and fruits nutritional supplement containing all macro and micro nutrients necessary for plant growth in a formula that stimulates the quality of flowering and fruits.
- **Minigarden® Grow Up Brown**, a biological nutritional supplement, is an organic extract enriched with micro nutrients for all kinds of plants and geared towards enthusiastic of biological growing.

URBAN GREEN REVOLUTION

# Easy to use

**Minigarden® Grow Up** is available in individual doses, a sachet with 3 grams to be diluted in 1.25L of irrigation water.

Plant nutrition with **Minigarden® Grow Up** is greatly facilitated with the convenience of its format, ease of transport and storage and precise dosing.

**Minigarden® Grow Up**'s main distinctive feature is that it provides plants with full and balanced nutrition.

The use of **Minigarden® Grow Up** in the Minigarden® Basic system is quite intuitive. Just open a sachet, pour the contents into the removable reservoir and fill with water. The precision of the concentration of the nutrition in the irrigation water is immediately guaranteed.

The versatility of this product also applies to conventional irrigation systems and other irrigation reservoirs:

- 1 sachet per 1.25L
- 2 sachets per 2.5L
- 4 sachets per 5L.

Tutorial video at [www.minigarden.net/welcomegrowup](http://www.minigarden.net/welcomegrowup).

# What they are

Strengthening the immune system of plants is essential for ensuring their healthy and balanced growth.

To guarantee the vitality and protection of your plants, we have developed **Minigarden Bug Off**, a new solution to stimulate and strengthen the natural defences of plants against pests and diseases.

**Minigarden® Bug Off** offers 2 solutions to protect plants, differentiated by the colours blue and red:

- **Minigarden® Bug Off Blue**, immune vitality supplement containing organic manure, boosting plant resilience and strengthening them against adverse conditions.
- **Minigarden® Bug Off Red**, immune protection supplement containing biological fertilizer, which improves the general growing conditions of the plant.

URBAN GREEN REVOLUTION

minigarden®

# Easy to use

**Minigarden® Bug Off** Blue and Red are available in individual doses of 3 ml and 7 ml, respectively, to be diluted in 1.25L of water.

Plants should be sprayed with both supplements regularly, every 8 days during the period of maximum growth and when the temperature and air humidity are high, preferably before any pests or diseases appear. Prevention is better than cure.

With **Minigarden® Grow Up** and **Bug Off** you can choose the supplement most appropriate for each plant to grow healthily and naturally protected.

The single doses of **Minigarden® Grow Up** and **Bug Off**, afford comfort in handling and precision in application.

Tutorial video at [www.minigarden.net/welcomebugoff](http://www.minigarden.net/welcomebugoff).

URBAN GREEN REVOLUTION

---

## 8- Minigarden® Accessories

---

---

## 8.1– Minigarden® Watering Can

---

# What it is

**Minigarden® Watering Can** is a modern watering can for any home growing system but also for Minigarden Vertical and Minigarden Corner conceived to easily control manual irrigation and plant nutrition.

**Minigarden® Watering Can**, ideal to use in conjunction with the nutritional supplement Minigarden Grow Up, has a 2,5 litre maximum capacity. It covers the essential nutritional needs for plant growth and health.

**Minigarden® Watering Can** includes 2 packs of each nutritional supplement Minigarden Grow Up, which should be diluted in the 2,5 litres of irrigation water, thus ensuring plants get the correct amount of nutrients.

# Design and convenience

**Minigarden® Watering Can** is comprised of 3 parts: a 2,5 litre water reservoir, alike Minigarden Basic M, a handle, and a water dispenser nozzle.

Its elegant design enables a comfortable watering and plant nutrition process, unlike any other.

It's easy to control the amount of water administered to plants because of the possibility of making slight adjustments to **Minigarden® Watering Can's** angle.

**Minigarden® Watering Can's** 2,5 litre capacity makes for an easy usage of Minigarden Grow Up because it ensures the correct amount of nutrition in the irrigation water: just add 2 sachets of Minigarden Grow Up ([for more information, please go to page 52](#)).

Its long, steerable nozzle makes for an easy watering process because it enables various positions. When the irrigation is done, there is no dripping.

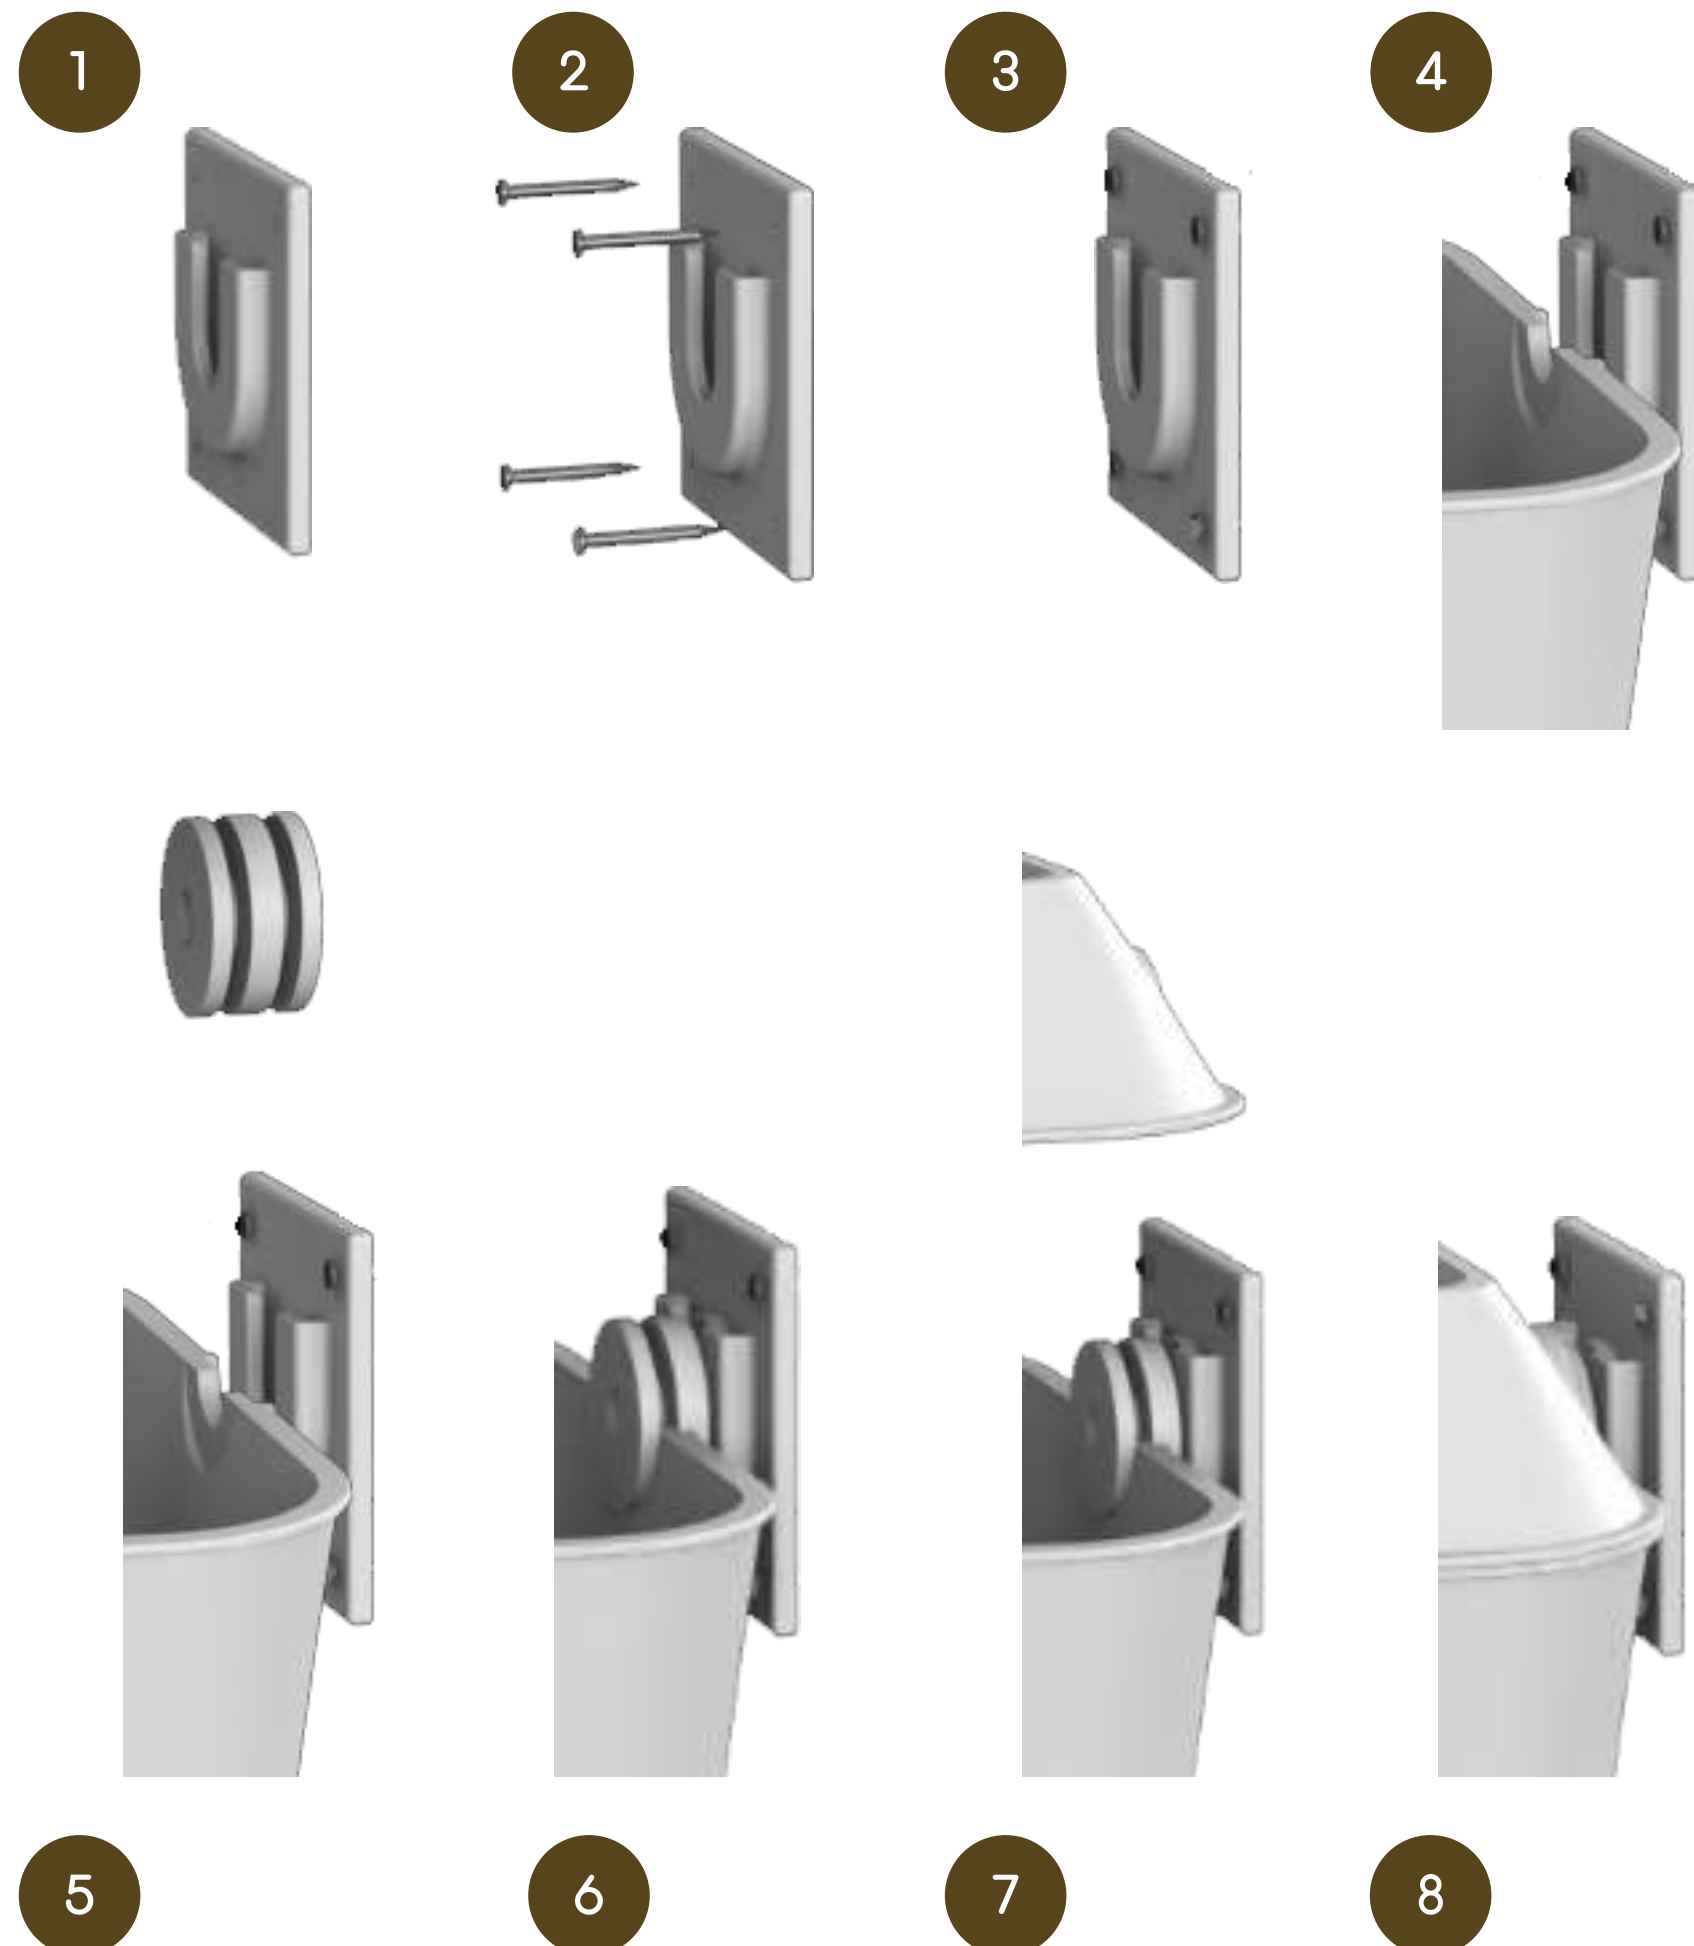

---

## 8.2- Minigarden® Fixers

---

NEW

# What they are

**Minigarden® Fixers** were created to secure both Minigarden Vertical and Corner to a wall, or other kinds of vertical surfaces.

After glueing **Minigarden® Fixers** on a wall, we advise you to reinforce the installation by using 4 hardened steel nails. Finally, place the circular clips on the **Minigarden® Fixers** and the Minigarden modules, either Vertical or Corner.

**Minigarden® Fixers** include double-sided high performance adhesive tape and hardened steel nails, so there are two fastening solutions: glue and/or steel nails.

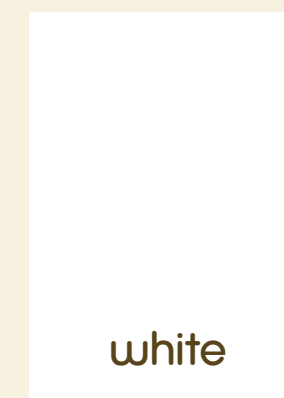

# Design and convenience

After securing either Minigarden Vertical or Corner to a wall with **Minigarden® Fixers**, they become invisible, or partially hidden, as they seamlessly integrate with the setup.

This ground-breaking solution is easier to assemble than through the use of screws and makes fastening on any surface, like stone, glass, ceramic and metal, more straightforward.

**Minigarden® Fixers** is made of high impact resistant polystyrene and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in 5 colours:

**Minigarden® Fixers** are available in 5 colours.

## 8.3- Wall Support for Minigarden® Vertical

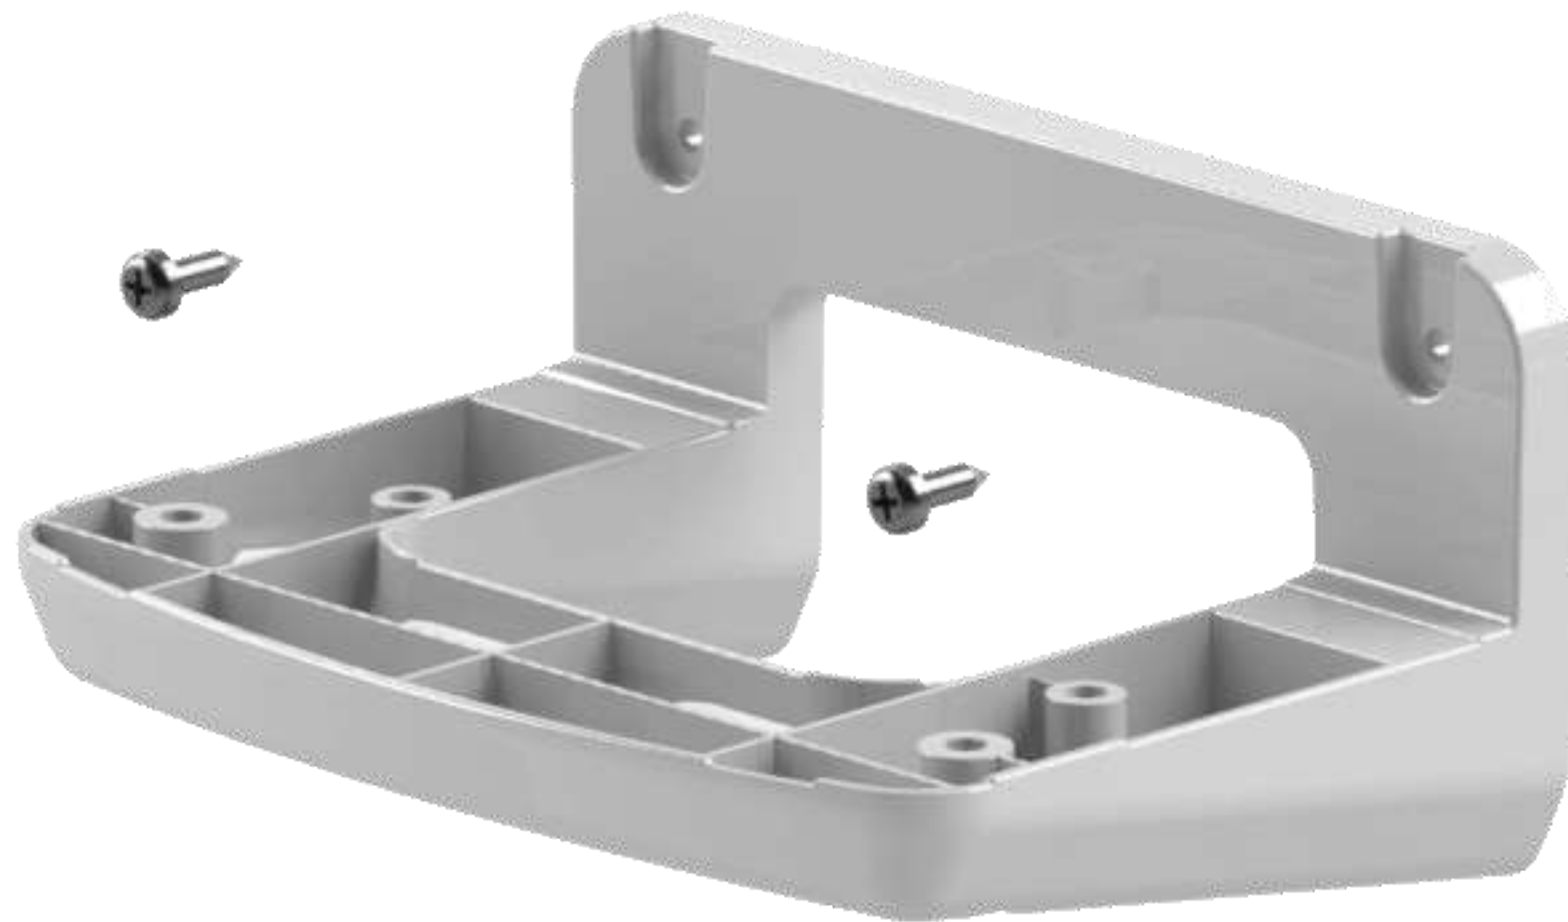

---

# What it is

**Wall Support for Minigarden® Vertical** is a bracket for wall mounting purposes that works in any suitable vertical surface and enables a secure hanging of Minigarden Vertical.

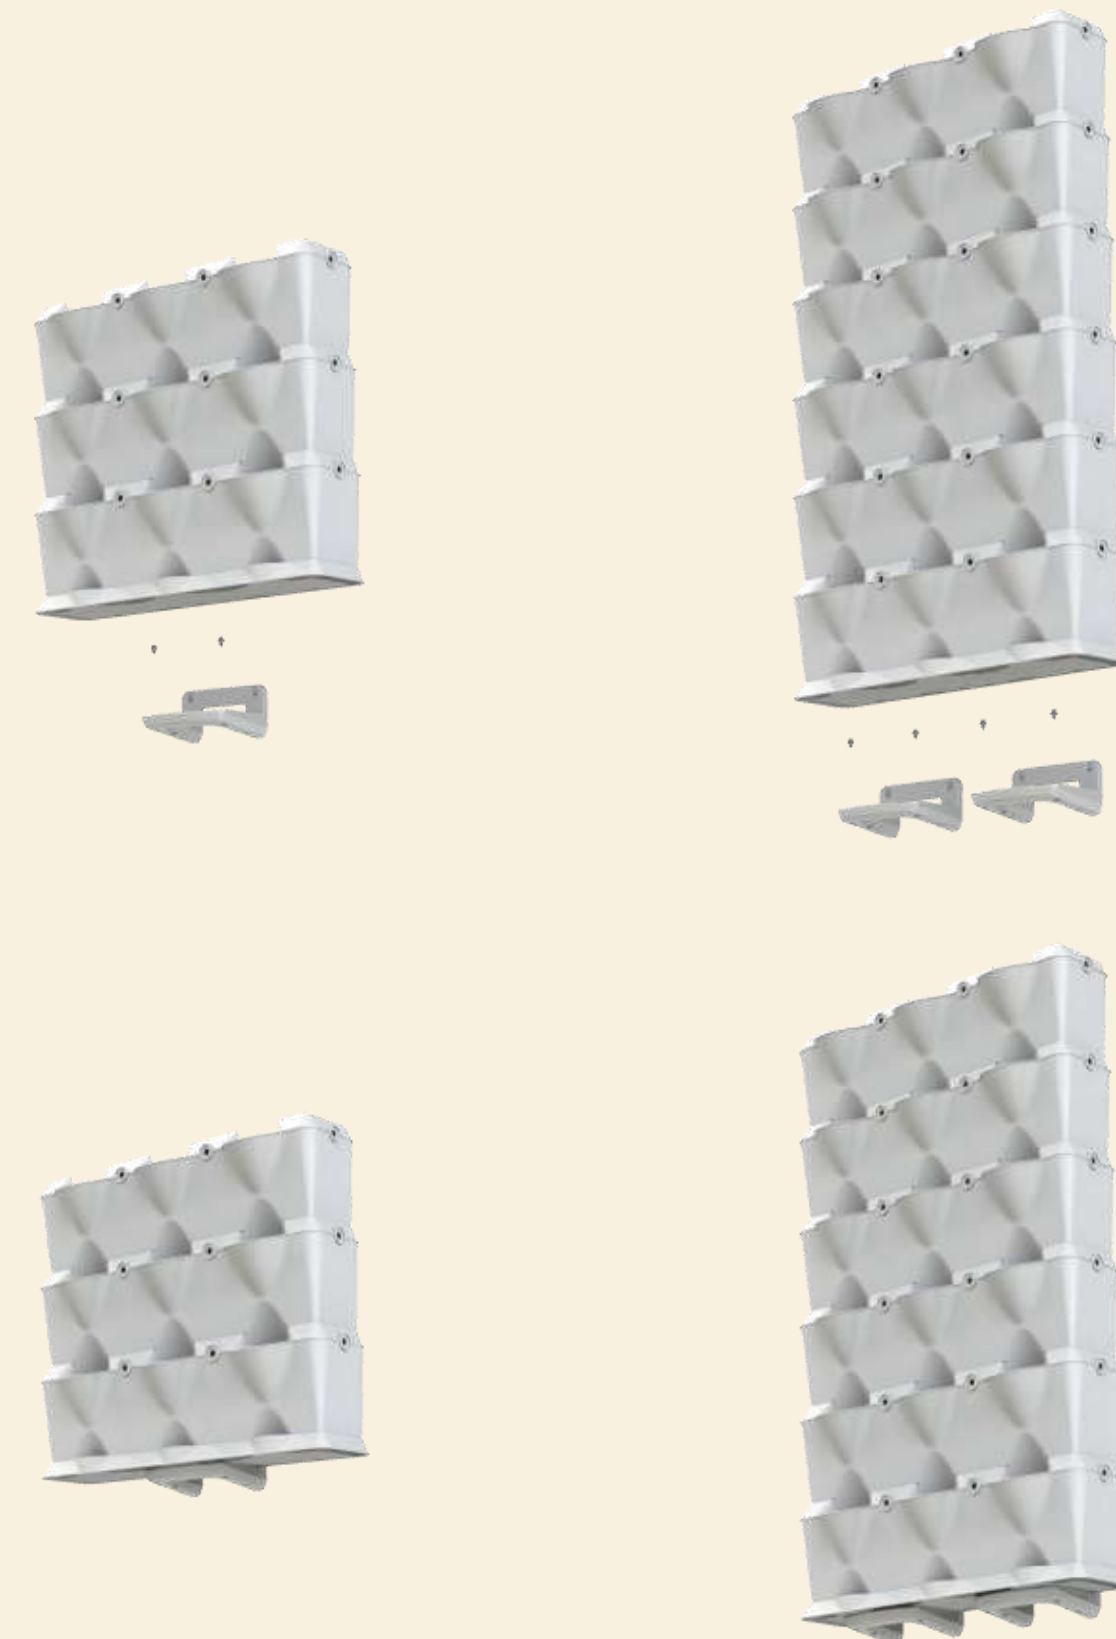

**Wall Support for Minigarden® Vertical** includes 2 stainless steel screws and 2 plugs for wall mounting, special pins to ensure a tight fastening to Minigarden Vertical's tray, and finally 2 Minigarden Fixers to secure one of Minigarden Vertical's modules to the wall.

Minigarden Fixers

NEW

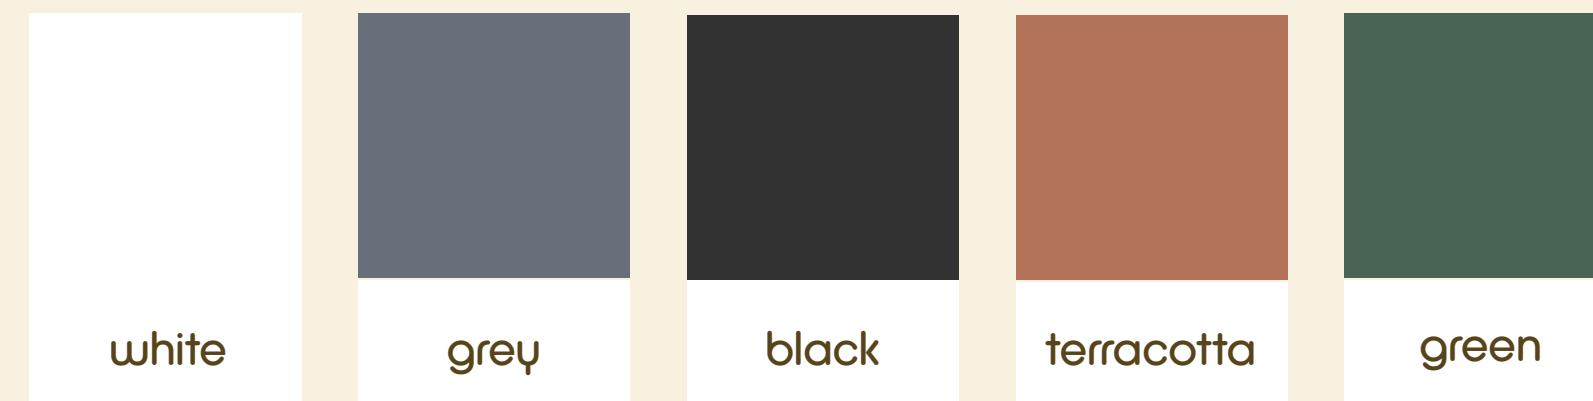

# Design and convenience

After installation, **Wall Support for Minigarden® Vertical** is discreet and seamlessly integrated with the gardening system.

**Wall Support for Minigarden® Vertical** is made of high resistance polypropylene copolymer and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in 5 colours:

Look at how simple it is to assemble **Wall Support for Minigarden® Vertical** at <https://youtu.be/1OQ0zu6wR48>.

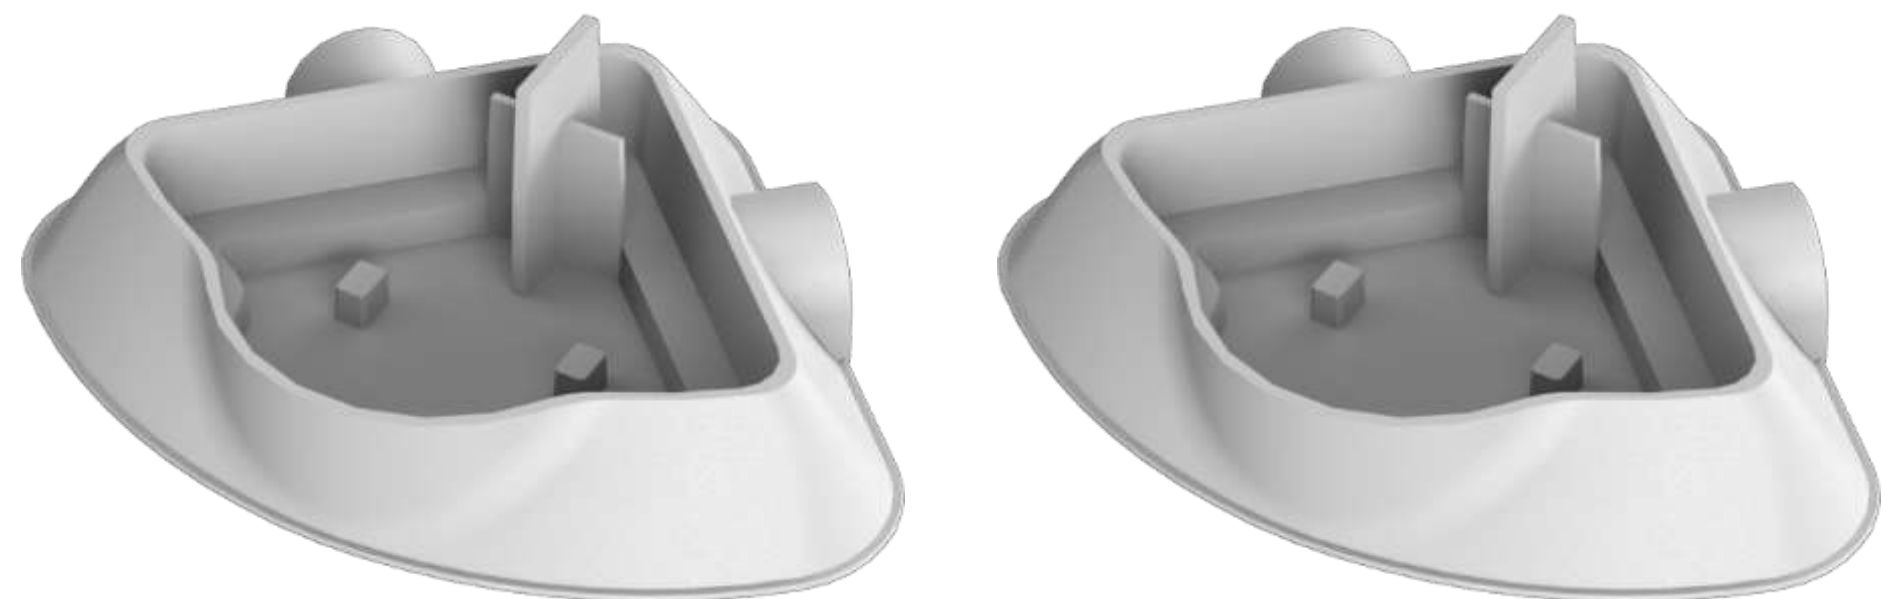

---

## 8.4- Wall Support for Minigarden® Corner

---

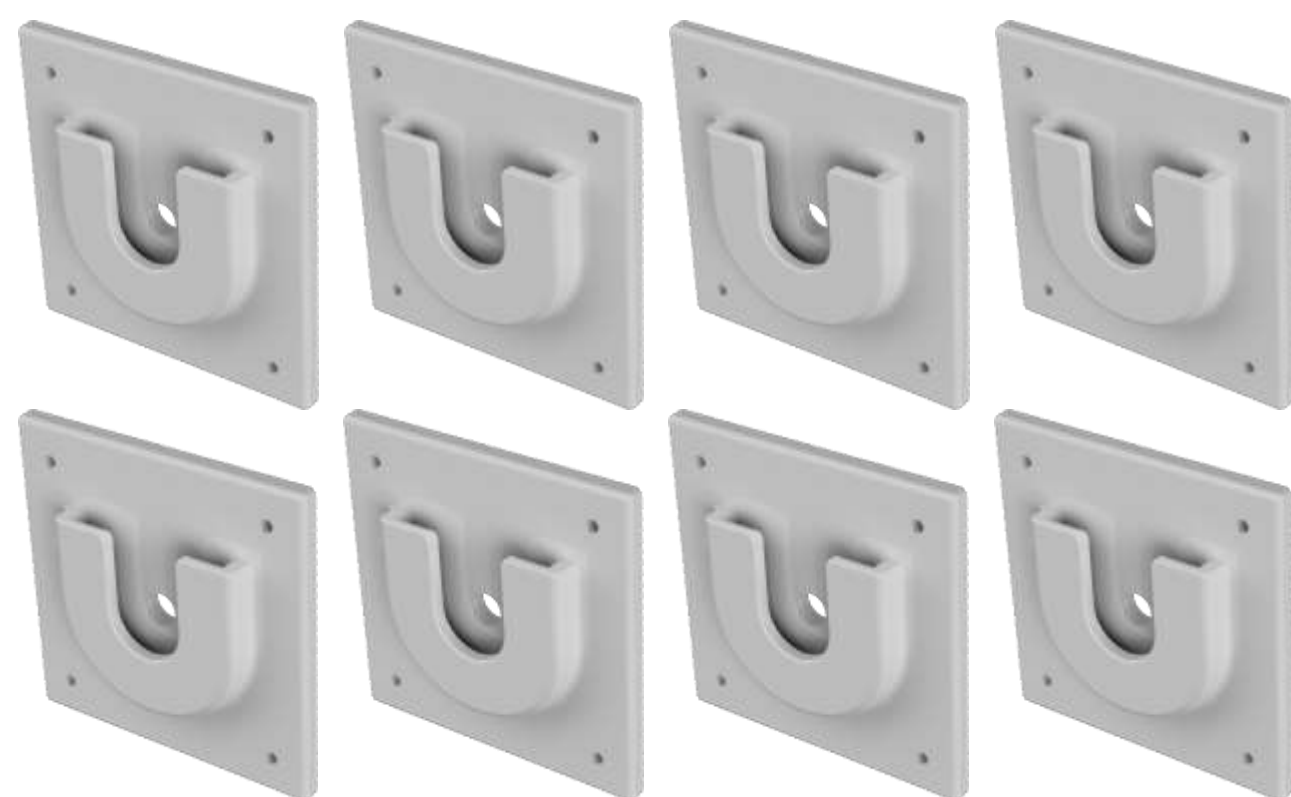

Circular Clips

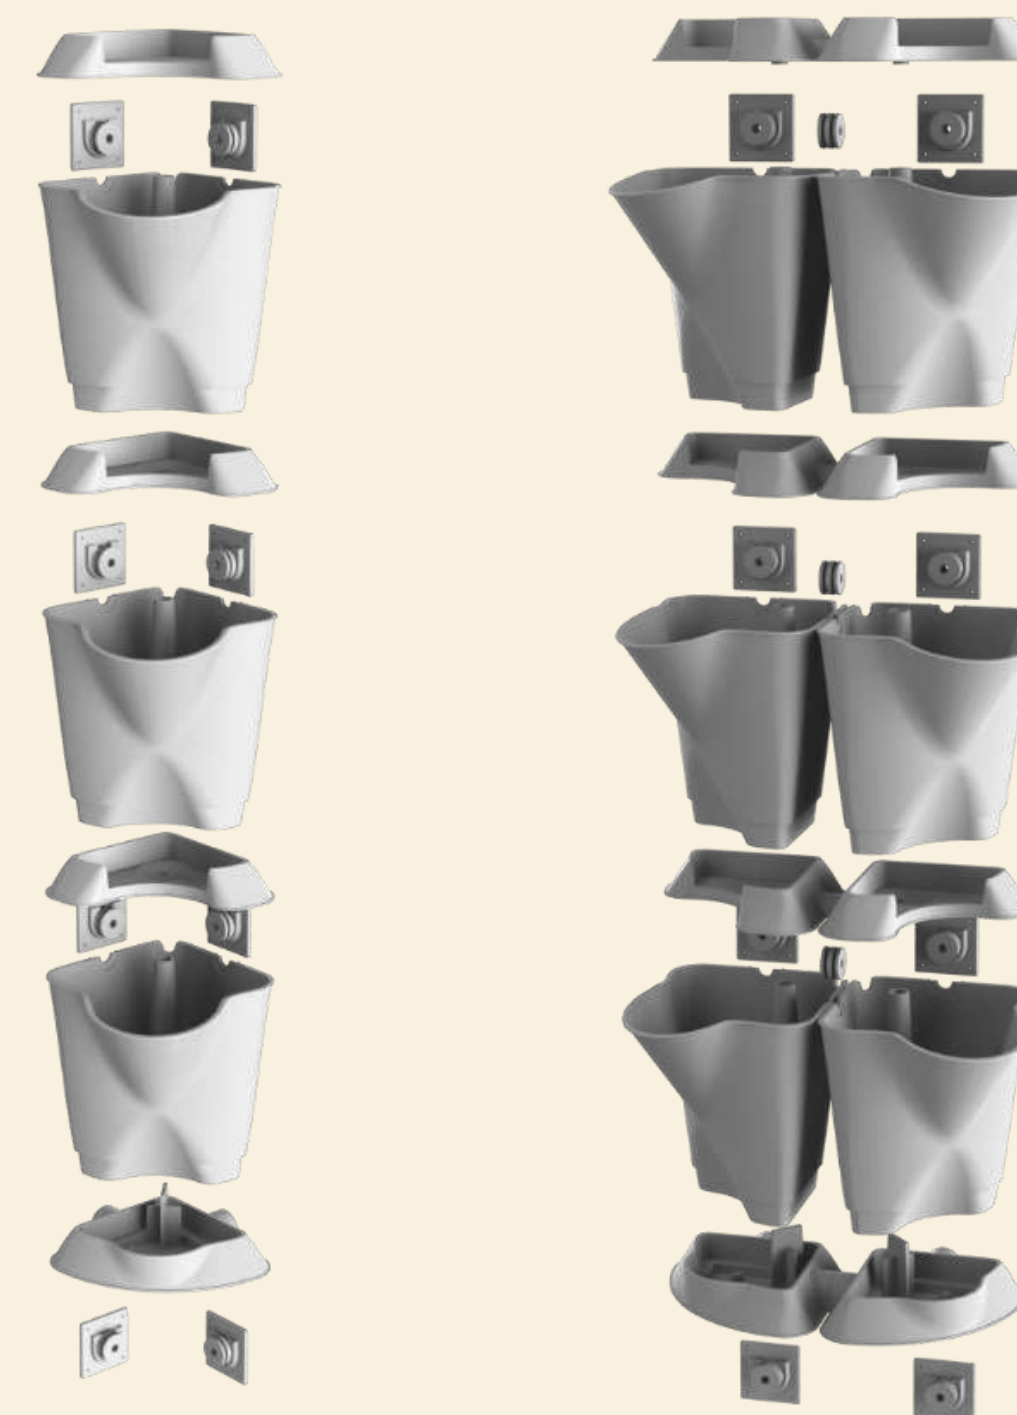

Minigarden Fixers

# What it is

**Wall Support for Minigarden® Corner** is a new accessory that enables hanging the gardening system in two different configurations: 3 modules on a corner, or 6 modules on a vertical surface (2 columns of 3 stacked modules set in a 180° half moon).

**Wall Support for Minigarden® Corner** comprises 2 special trays, 3 circular clips, and 8 Minigarden Fixers that include 32 hardened steel nails to reinforce the installation and secure the system to a wall.

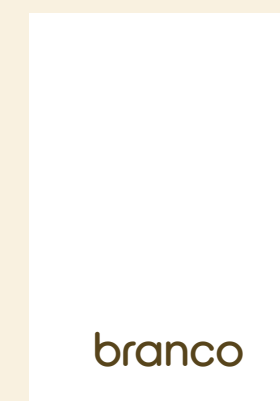

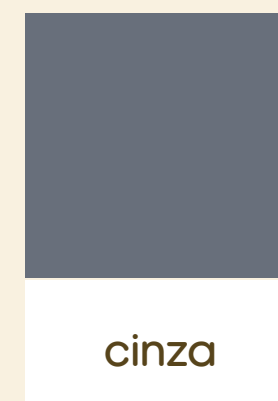

# Design and convenience

After installation, **Wall Support for Minigarden® Corner** is discreet and seamlessly integrated with the gardening system.

**Wall Support for Minigarden® Corner** is also made of high resistance polypropylene copolymer and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in 5 colours:

---

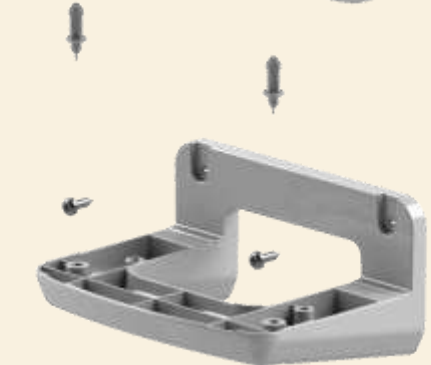

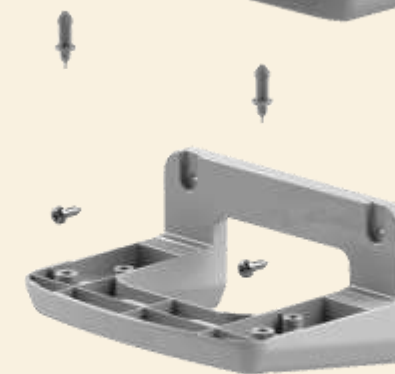

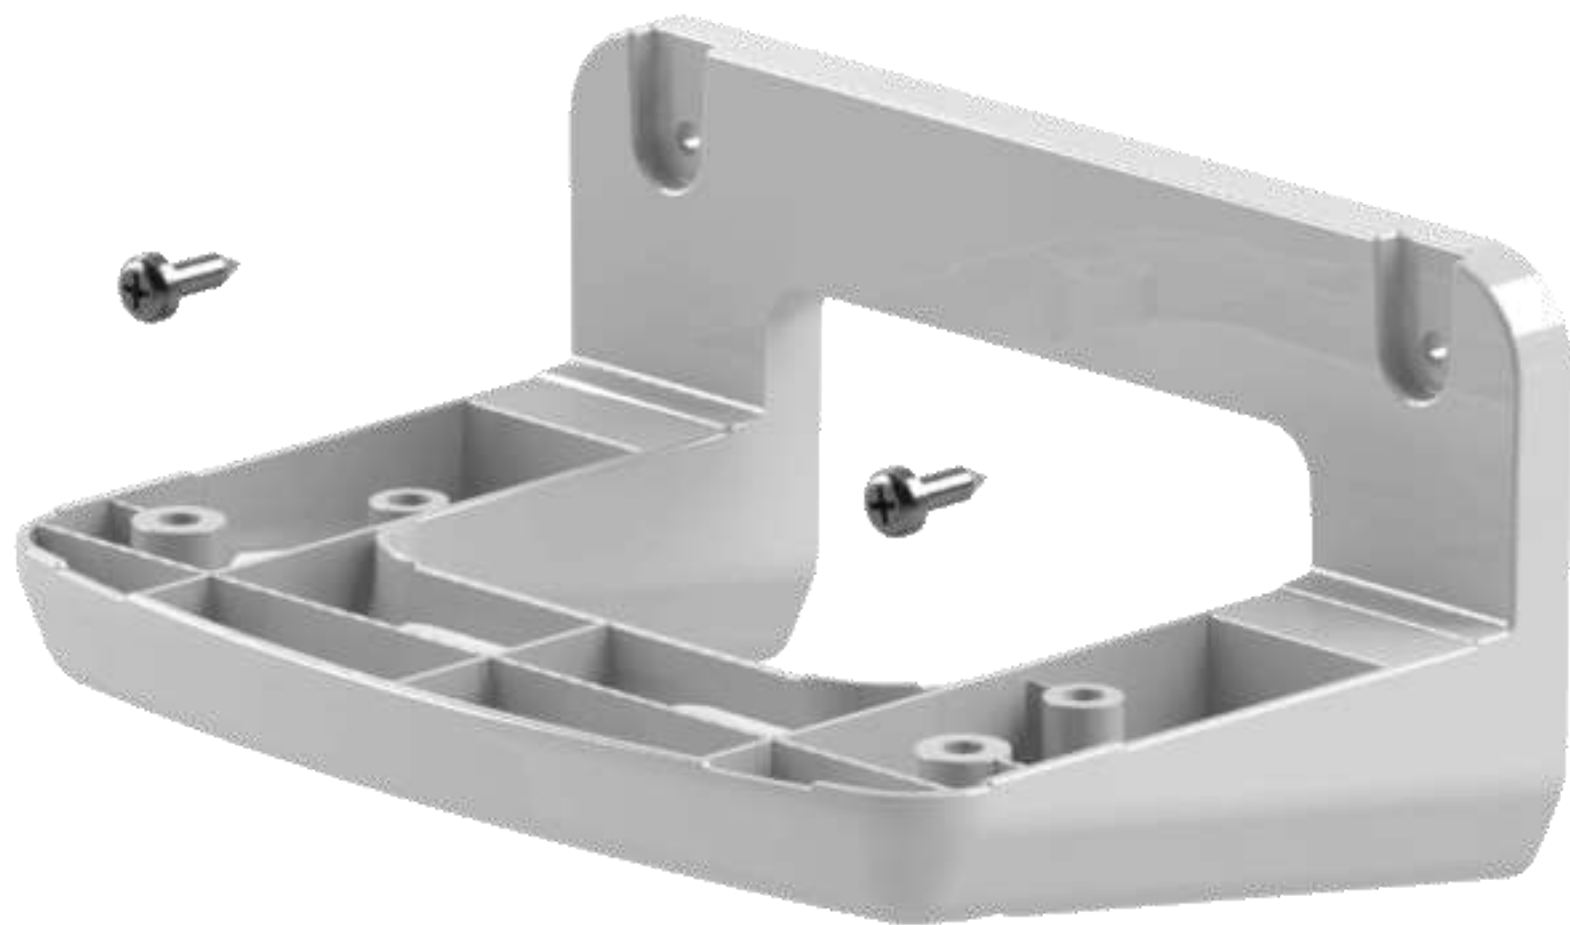

## 8.5- Wall Support for Minigarden® Basic

---

# What it is

**Wall Support for Minigarden® Basic** is a bracket for wall mounting purposes that works in any suitable vertical surface and enables a secure hanging of Minigarden Basic S Pots, Minigarden Basic S Uno or Minigarden Basic M Pots.

URBAN GREEN REVOLUTION

# Design and convenience

**Wall Support for Minigarden® Basic** comprises 2 stainless steel screws and 2 plugs to secure it onto the wall, and special studs that enable a solid fixing onto Minigarden Basic and Minigarden Vertical.

After its set up, **Wall Support for Minigarden® Basic** remains discretely and perfectly harmonized with Minigarden Basic, looking like a built-in element of these two growing systems.

The **Wall Support for Minigarden® Basic** is also made of high resistance polypropylene copolymer and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in white colour.

Look at how simple it is to assemble **Wall Support for Minigarden® Basic** at <https://youtu.be/4WXIKwJW9Vs>.

URBAN GREEN REVOLUTION

---

## 8.6- Color Rings

---

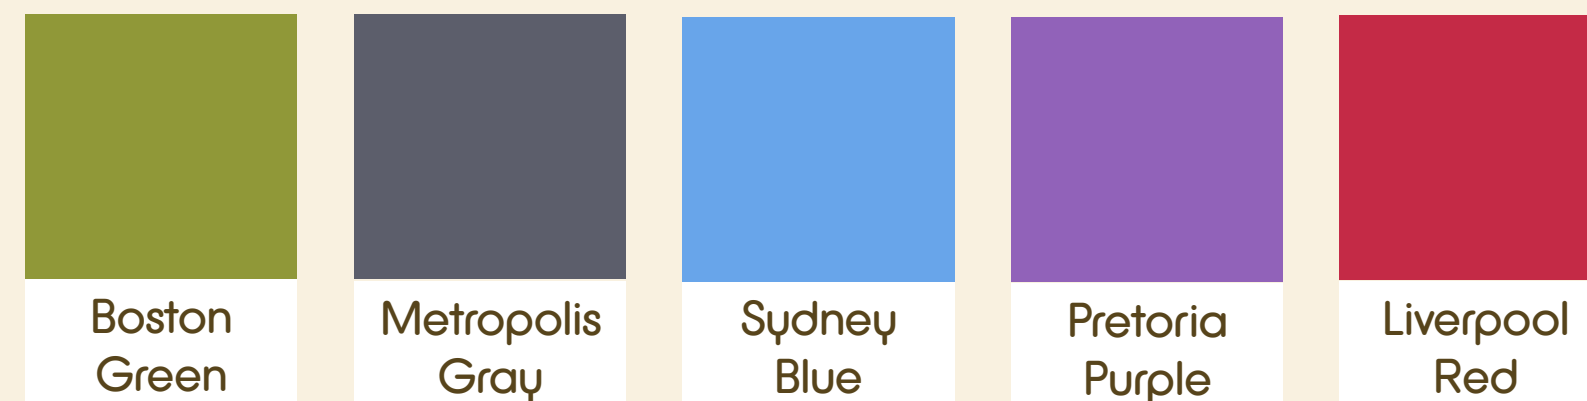

# What they are

Our **Color Rings** are covers for Minigarden Basic S that bring new life to this gardening system. They replace the original top surface and the round base on which the water reservoir rests.

This new accessories are made of high resistance polypropylene copolymer and includes additives for protection against ultraviolet rays, which allows it to be used in extreme weather conditions (solar radiation and temperature), having a ten-year guarantee for its integrity. It is also reusable, fully recyclable and available in 5 colours:

URBAN GREEN REVOLUTION

minigarden

# Design and convenience

Choose your favourite color, customise your Minigarden Basic S Pots or Minigarden Basic S Uno, and match it with different plants and environments.

The right colour for each plant or place only depends on a simple ring switch.

Look at how easy it is with our videos at <https://vimeo.com/124397108> and <https://vimeo.com/124401360>.

---

# 9- World Revolution

---

# World revolution

**Minigarden®** is represented in five continents through numerous distribution partnerships. We are present in more than 50 countries and we are working to turn **Minigarden™** into a world renowned brand.

Our team, includes engineers (structures, materials, environment and agronomy), designers and landscapers, is working to develop new products and new solutions for a greener world.

The Urban Green Revolution knows no boundaries.

# MINIGARDEN VERTICAL 1 SET: TECHNICAL DATA

## Patents and Registrations

The Minigarden® Vertical is protected by a worldwide patent via PCT (Patent Cooperation Treaty) with the number PCT/PT2006/0000003 and also by design/model registrations.

## Product description

Selling unit:	Tray	Module	Set
Contains:	1 Tray	1 Module + 6 Clips	3 Modules + 18 Clips + 1 Tray

Dimensions:	64.6 x 14 x 3 cm	64.6 x 19 x 20 cm	64.6 x 19 x 57 cm
Maximum Capacity:		12 liters	36 liters
Recommended Capacity:		10 liters	30 liters
Weight:	0.34 kg	1.01 kg	3.35 kg
Material:	Polypropylene Moplen with UV protection		
Finishing:	Matt, Grain MT-11007		
Colours:	White, Black, Green, Terracotta and Gray		
Manufacturing Guarantee:	3 years		
Other Features:	100 % recyclable		

## Packaging

We have developed new cardboard box packaging with high resolution printing in four colours on all external surfaces. The packaging is quite appealing for points of sale, includes a handle for easy transport for customers and is written in nine languages (English, Mandarin, Spanish, Portuguese, French, Russian, German, Japanese and Italian). For direct sales (web shop, catalogue, TV shop, etc.) the packaging is sturdy enough for transport by mail. For professional installers a shipping box is provided with 26 modules and a cardboard box with 13 trays.

## Packing – Stores and Mail Order

Cardboard Box 1 set

Contains:	1 Set and 1 instructions leaflet and 1 brochure
